Research Handbook on Human Resource Management and Disruptive Technologies Tanya Bondarouk,Jeroen Meijerink,2024-03-14 This comprehensive and judicious Research Handbook examines the fundamental influence of the emergence of contemporary disruptive technologies including artificial

intelligence online platforms the internet of things and social robots on Human Resource Management HRM **Semantic Technologies for Intelligent Industry 4.0 Applications** Archana Patel,Narayan C. Debnath,2023-10-06 As the world enters the era of big data there is a serious need to give a semantic perspective to the data in order to find unseen patterns derive meaningful information and make intelligent decisions Semantic technologies offer the richest machine interpretable rather than just machine processable and explicit semantics that are being extensively used in various domains and industries These technologies reduce the problem of large semantic loss in the process of modelling knowledge and provide sharable reusable knowledge and a common understanding of the knowledge As a result the interoperability and interconnectivity of the model make it priceless for addressing the issues of querying data These technologies work with the concepts and relations that are very lose to the working of the human brain They provide a semantic representation of any data format unstructured or semi structured As a consequence data becomes real world entity rather than a string of characters For these reasons semantic technologies are highly valuable tools to simplify the existing problems of the industry leading to new opportunities However there are some challenges that need to be addressed to make industrial applications

and machines smarter This book aims to provide a roadmap for semantic technologies and highlights the role of these technologies in industry The book also explores the present and future prospects of these semantic technologies along with providing answers to various questions like Are semantic technologies useful for the next era industry 4 0 Why are semantic technologies so popular and extensively used in the industry Can semantic technologies make intelligent industrial applications Which type of problem requires the immediate attention of researchers Why are semantic technologies very helpful in people s future lives This book will potentially serve as an important guide towards the latest industrial applications of semantic technologies for the upcoming generation and thus becomes a unique resource for scholars researchers professionals and practitioners in the field **Handbook of Labour Geography** Andrew Herod,2025-10-07
