Olsen, 2006-01-01 Taking the revival of civic republicanism as his point of departure Erik Olsen examines the relationship between property civic virtue and democracy in post socialist political thought Steering a course between the crass materialism that post socialists criticize and their own post materialist perspective Olsen outlines a theory of democratic stakeholding in which citizens have rights of inhabitation in their commonwealth

Anarchism and Art Mark Mattern, 2016-03-01 Situated at the intersection of anarchist and democratic theory Anarchism and Art focuses on four popular art forms DIY Do It Yourself punk music poetry slam graffiti and street art and flash mobs found in the cracks between dominant political economic and cultural institutions and on the margins of mainstream neoliberal society Mark Mattern interprets these popular art forms in terms of core anarchist values of autonomy equality decentralized and horizontal forms of power and direct action by common people who refuse the terms offered them by neoliberalism while creating practical alternatives As exemplars of central anarchist principles and commitments such forms of popular art he argues prefigure deeper forms of democracy than those experienced by most people in today's liberal democracies That is they contain hints of future more democratic possibilities while modeling in the present the characteristics of those more democratic possibilities Providing concrete evidence that progressive change is both desirable and possible they also point the way forward

American Democracy in Crisis Jeanne Sheehan, 2025-02-28 This book analyzes the roots of widespread

disenchantment with American government While blame often falls on the individuals in office they are not operating in isolation Rather they are working within a system designed by the Framers with one goal in mind protectionism Although the Framers got much right their commitment to protection of liberty led them to design a system replete with divisions of power Whatever its merits at the founding the government today is frequently described as dysfunctional and far too often unresponsive to the majority unaccountable and unable to deliver for its people For those disillusioned with the current state of government and committed to effectuating meaningful change this book advocates in favor of a fundamental reassessment of the system s primary objectives followed by deliberation as to how it should be restructured accordingly It not only presents specific reform proposals but it ends with a stark warning until and unless we embrace reasoned structural reform we cannot be surprised if at some point the people become so frustrated that they either disengage fight back or seek solace in autocratic alternatives This new edition includes audiobook files created by a state of the art text to speech tool at the chapter level

Neighborhood Democracy Richard Guarasci, 2023-07-03 Higher education and America stand at a perilous moment brought about by economic and social inequality racism and the fracture of civic cohesion and structures From its origins the mission of American higher education was to promote democratic governance and a free fair and orderly society through the education of responsible citizens Just as its mission has become more urgent it is being undermined as colleges and universities find themselves trapped in a fiscal crisis that threatens their very institutional viability a crisis in large part brought about by the very perpetuation of economic and racial inequity and the consequent erosion of consensus about civic purpose and vision This book argues that higher education can and must again take leadership in promoting the participatory processes and instilling the democratic values needed to build a vibrant and fair society How to do that when as Guarasci argues a majority of colleges and universities are floundering under a business model that generates insufficient net revenue while making college unaffordable Guarasci offers a model of civic mission and engagement whereby through relatively modest investment colleges can develop reciprocal partnerships with local institutions civic and business groups to raise the quality and outcomes of K 12 education promote local entrepreneurship and community involvement raise incomes and increase the attainment of postsecondary education to benefit the wider national economy and colleges around the region and country He demonstrates how civic engagement can revitalize communities and generate developmental and foundation funding Vividly illustrated by the examples of success of students from the shadow community to which Wagner College committed its energies and resources by the stories of the local schools and their principals and the voices of local partners this book offers a compelling and detailed account of what it takes to transform an institution and a neighborhood and a model of renewal A Co Publication with AAC U
