2016 University Of Eastern Cape Prospectus:

Higher Education - Reflections From the Field - Volume 1, 2023-11-02 COVID wrought havoc on the world's economic systems. Higher education did not escape the ravages brought on by the pandemic as institutions of higher education around the world faced major upheavals in their educational delivery systems. Some institutions were prepared for the required transition to online learning. Most were not. Whether prepared or not, educators rose to the challenge. The innovativeness of educators met the challenges as digital learning replaced the face-to-face environment. In fact, some of the distance models proved so engaging that many students no longer desire a return to the face-to-face model. As with all transitions, some things were lost while others were gained. This book examines practice in the field as institutions struggled to face the worst global pandemic in the last century. The book is organized into four sections: The Perspectives of Higher Education, COVID as a Catalyst for Change, Embracing Online Learning as a Response to COVID, and Post-Covid The Way Forward. It presents various perspectives from educators around the world to illustrate the struggles and triumphs of those facing new challenges and implementing new ideas to empower the educational process. These discussions shed light on the impact of the pandemic and the future of higher education post-COVID. Higher education has been forever changed, and higher education as it once was may never return. While many questions arise, the achievements in meeting and overcoming the pandemic illustrate the creativity and innovativeness of educators around the world who inspired future generations of learners to reach new heights of accomplishment even in the face of the pandemic.

Recalibrating teacher training in African higher education institutions Sifiso Sibanda, Gideon (Deon) P. van Tonder, Washington T. Dudu, 2023-03-01 This book critically examines the role of governments in promoting parity during and in post-pandemic education. This comes from the realisation that the pandemic has deepened the crisis by depleting the meagre resources that African countries might have devoted to normative educational practices where those on the margins would have been pushed further behind while the privileged would have been further initiated into the cultural and capital flows of private schools and historically research-intensive institutions of higher learning. This has far-reaching implications for the education of underprivileged citizens and education, particularly modes and modalities of delivery, has to be reimaged to subvert the challenges wrought by the pandemic. This book significantly bridges the gap between the pre and post-COVID 19 pandemic pedagogical practices and the erstwhile modalities that have been resilient over time. The book focuses on ways to stave off pedagogical challenges that face countries as the global pandemic makes its mark.

Assembly Codes Matthew Hockenberry, Nicole Starosielski, Susan Zieger, 2021-08-02 The contributors to Assembly Codes examine how media and logistics set the conditions for the circulation of information and culture. They document how logistics, the techniques of organizing and coordinating the movement of materials, bodies, and information, has substantially impacted the production, distribution, and consumption of media. At the same time, physical media such as paperwork along with media technologies ranging from phone systems to software are

central to the operations of logistics The contributors interrogate topics ranging from the logistics of film production and the construction of internet infrastructure to the environmental impact of the creation distribution and sale of vinyl records They also reveal how logistical technologies have generated new aesthetic and performative practices In charting the specific points of contact dependence and friction between media and logistics *Assembly Codes* demonstrates that media and logistics are co constitutive and that one cannot be understood apart from the other Contributors Ebony Coletu Kay Dickinson Stefano Harney Matthew Hockenberry Tung Hui Hu Shannon Mattern Fred Moten Michael Palm Ned Rossiter Nicole Starosielski Liam Cole Young Susan Zieger *The Changing Space Economy of City-Regions* Koech

Cheruiyot, 2017-10-30 This book addresses the South African Space Economy and its stark disparities and dualisms through an assessment of the Gauteng City Region the largest economic agglomeration in the country and on a continent bedevilled by a myriad of development challenges The book s focus on understanding the overall character of Gauteng City Region s Space Economy through data mining analysis and mapping comprehensively supplements the Space Economy literature on the region It covers the disparities exacerbated by an overlay of apartheid planning ideology and top down regional development based on selective encouragement of manufacturing investments in growth points or poles and how implementation of past policies intended to cure these disparities have yielded mixed results This book further offers the Gauteng City Region as a microcosm of the national economy in the form of evident significant placed based variations in the intensity and character of economic structure that on the one hand enjoys massive agglomeration economies while on the other has high levels of poverty and large numbers of people living below the Minimum Living Level This book should appeal to urban studies specialists economists and development studies researchers in the Global South **The Emerald**
