204 Global Paper Das Investment:

Investing into North African Solar Power Robert Gömmel, 2015-03-28 This book investigates how a North African solar thermal power plant can be set up under the guidance of European investors e.g. the Desertec Concept as a Public Private Partnership PPP. It outlines the importance of early awareness of contract related risks, investment risks and dispute settlement, arguing that commercial and investment arbitration are the best tools for settling disputes regarding a large scale solar thermal project. Furthermore, by comparing institutional and ad hoc arbitration, it shows that the former offers highly suitable support. The latest developments in the area of investment arbitration under EU law and the general acceptance of arbitration in Islamic countries are examined in particular. This book also demonstrates that a solar thermal power plant must meet certain requirements to be considered an investment. These requirements are examined in relation to Art 25 of the International Centre for Settlement of Investment Disputes Convention (ICSID Convention) and respective case law. Overall, the book offers valuable guidelines for investors and host states on how to successfully implement large scale solar thermal projects.

Explaining International Production (Routledge Revivals) John H. Dunning, 2014-11-13 John Dunning's general theory of international production, first propounded in the late 1970s, has generated considerable debate. This work thoughtfully reassesses the paradigm and extends the analysis to embrace issues of theoretical and empirical importance. In a collection of essays, the changing characteristics of international production are examined, and an interdisciplinary approach is suggested for understanding the multinational enterprise in the world economy. This book, first published in 1988, will be of value not only to economists and international business analysts but to scholars in other fields, notably organizational marketing and management specialists.

Corporate Governance and Investment Management Roger M. Barker, Iris H.-Y. Chiu, 2017-12-29 Shareholder engagement with publicly listed companies is often seen as a key means to monitor corporate malpractices. In this book, the authors examine the corporate governance roles of key institutional investors in UK corporate equity, including pension funds, insurance companies, collective investment funds, hedge and private equity funds, and sovereign wealth funds. They argue that institutions' corporate governance roles are an instrument ultimately shaped by private interests and market forces, as well as law and regulatory obligations, and that policy makers should not readily make assumptions regarding their effectiveness or their alignment with public interest or social good.

Fair and Equitable Treatment and the Fabric of General Principles Fulvio Maria Palombino, 2017-11-27 This book moves from the circumstance whereby currently the obligation to provide fair and equitable treatment (FET) to foreign investments is included in the majority of international investment agreements and has proved to be the most invoked standard in investor-State arbitration. Hence, it is no overstatement to describe this standard as the basic norm of international investment law. Yet, both its meaning and normative basis continue to be shrouded in ambiguity, and as a consequence, to inspire a considerable number of interpretations by legal writers. The book's precise aim is to unravel such ambiguity, arguing from the idea that

FET has become part of the fabric of general international law but has done so by means of a source somewhat neglected in legal doctrine. This being the category of general principles peculiar to a certain field of international law, i.e. those principles having their own foundations in the international legal order itself but which through the mediation of the judge end up being shaped according to the features typical of a specific normative field. The book, as well as having a solid theoretical backdrop as its basis, offers a careful and critical analysis of pertinent case law and will prove useful to both scholars and practitioners. Fulvio Maria Palombino is Professor of International Law at the Law Department of the University of Naples Federico II and a member of the Executive Board of the European Society of International Law. Specific to this book: Explains the ICSID practice clearly and concisely; Useful in practical terms. Excerpts from a review: Fair and Equitable Treatment and the Fabric of General Principles is an original and well researched book in which the author challenges a number of conventional wisdoms on FET. Among the strengths of the book one can mention the solid discussion of public international law principles relevant to FET and the interesting incursions into domestic law legal systems which play an important role in the understanding of FET components such as due process, legitimate expectations or proportionality. In particular, the section on promises provides a convincing analysis of the issues that arise when the administration makes an assurance or representation to an investor. Against the backdrop of the examination of unilateral acts under public international law, Palombino's analysis sheds new light on what ought to be the proper scope of protection under the legitimate expectations doctrine in case of governmental promises, clarifying a number of points which have received insufficient attention by arbitral tribunals thus far. It is well known that investments in real estate provide relatively stable yields compared with stock market volatility, so it is not surprising that with globalisation investors have pursued such opportunities across borders, especially where foreign countries offer beneficial tax regimes. Nor is it surprising that states should fear erosion of their tax base in the presence of such investments. This groundbreaking book, the first in depth comparative analysis of taxation of real estate investment trusts (REITs) in different European Union (EU) Member States, investigates the impact of EU law on direct taxation in the case of REITs and whether EU policies in this area have led national legislators to adjust their REIT regimes. Presenting detailed case studies of three EU Member States: France, a well established REIT regime; Bulgaria, a new accession state; and Spain, a recent REIT regime, this book explores the idea of a harmonised EU REIT and whether harmonisation among national REIT regimes may be possible. Among the issues and topics arising in the course of the presentation are the following: goodness of fit and adaptational soft pressure; relevant case law from the European Court of Justice including both tax and company law; REIT shopping; noncompliance of REIT regimes with EU law and criteria for the

misfit analysis of REIT regimes and potential infringements of EU law The analysis ultimately documents conditions and circumstances for the creation of a harmonised Euro REIT by assessing the level of change on the area of direct taxation within the Member States which would be needed for such a creation to become reality identifying common themes across different legal systems that could assist the harmonisation of laws Throughout a holistic view is taken linking tax and company law with considerations of sovereignty policy and culture In its structured framework comparing REIT regimes this incomparable study takes a giant step towards overcoming resistance to a common REIT taxation regime in the EU As the first comparative study of REIT regimes to identify an emerging common understanding informed by European jurisprudence and Europeanisation policy and theory it is sure to be welcomed by practitioners academics and policymakers in European law and international taxation as well as European studies Bibliographie der Wirtschaftswissenschaften ,1999
