Chapter 3 - Water Resources

In Chapter 3 of Class 10 Geography, you will learn about water resources. The chapter begins with the availability of fresh water on earth and how the situation of scarcity of water generates. The chapter discusses the pros and cons of constructing dams on rivers. In the end, the chapter talks about Rain Water Harvesting as a means to conserve water. Here, we have compiled the [CBSE Notes for Class 10 Geography Chapter 3 on Water Resources](#). These notes cover all the important topics which are discussed in the chapter.

Water

Three-fourth of the earth's surface is covered with water but only a small proportion of it accounts for freshwater that can be put to use. Water is a renewable resource.

Water Scarcity and the Need for Water Conservation and Management

The availability of water resources varies over space and time.

- Water scarcity is caused by over-exploitation, excessive use and unequal access to water among different social groups.
- Water resources are being over-exploited to expand irrigated areas for dry-season agriculture.
- In some areas, water is sufficiently available to meet the needs of the people. But, those areas still suffer from water scarcity due to bad quality of water.

The need of the hour is to conserve and manage our water resources:

- To safeguard ourselves from health hazards.
- To ensure food security, continuation of our livelihoods and productive activities.
- To prevent degradation of our natural ecosystems.

Multi-Purpose River Projects and Integrated Water Resources Management

In ancient times, we used to conserve water by constructing sophisticated hydraulic structures like dams built of stone rubble, reservoirs or lakes, embankments and canals for irrigation. We have continued this tradition in modern India by building dams in most of our river basins.

Dams

A dam is a barrier across flowing water that obstructs, directs or retards the flow, often creating a reservoir, lake or impoundment. "Dam" refers to the reservoir rather than the structure.

Uses of Dam:

Dams are built:

- To impound rivers and rainwater that can be used later to irrigate agricultural fields.
- For electricity generation.
- Water supply for domestic and industrial uses.
- Flood control.
- Recreation, inland navigation and fish breeding.
