Algebra Connections Chapter 7 Answers:

Planting the Seeds of Algebra, PreK-2 Monica Neagoy, 2012-04-20 The subject of algebra has always been important in American secondary mathematics education. However, algebra at the elementary level has been garnering increasing attention and importance over the past 15 years. There is consequently a dire need for ideas, suggestions, and models for how best to achieve pre-algebraic instruction in the elementary grades. *Planting the Seeds of Algebra* will empower teachers with theoretical and practical knowledge about both the content and pedagogy of such instruction and show them the different faces of algebra as it appears in the early grades. The book will walk teachers of young children through many examples of K-6 math lessons and unpack step by step the hidden connections to higher algebra. After reading this book, teachers will be better equipped.

Making Math Connections Hope Martin, 2006-07-27 *Making Math Connections* integrates mathematics into a variety of subject areas and real-life settings, providing motivation for students to want to learn the material being presented. The book also uses a variety of activities to promote learning for students with different interests and learning styles. Steven P. Isaak, Mathematics Teacher, Advanced Technologies Academy, Las Vegas, NV, Spark student learning by making an authentic connection between math and real-life experiences. Students often fail to make the connection between school math and their everyday lives, becoming passive recipients of isolated memorized rules and formulas. This remarkable new resource will help students become active problem solvers who see mathematics as a meaningful tool that can be used outside the classroom. Hope Martin applies more than 40 years of teaching experience to developing a myriad of high-interest, meaningful math investigations. Using a teacher-friendly format, she shows educators how to integrate into the math curriculum engaging everyday topics such as forensics, natural disasters, tessellations, the stock market, and literature. This project-based resource encourages cooperative, interactive learning experiences that not only help students make connections between various math skills but also make important connections to the real world. Aligned to NCTM standards, these mathematical applications are broken down into complete units focusing on different topics. Each chapter includes background information on the topic, step-by-step procedures for math investigations, assessment strategies, journal questions, reproducible worksheets, additional related readings, and Internet Web sites. By increasing their awareness of meaningful everyday applications, students will learn to use math as an essential tool in their daily lives.
