The Lure of the Edge Brenda Denzler, 2001-11-07 UFO phenomena entered American consciousness at the beginning of the Cold War when reports from astonished witnesses of encounters with unknown aerial objects captured the attention of the United States military and the imagination of the press and the public. But when UFOs appeared not to be hostile and when some scientists pronounced the sightings to be of natural meteorological phenomena misidentified due to Cold War jitters, military interest declined sharply and with it further overt scientific interest. Yet sighting reports didn't stop and UFOs entered the public imagination as a cultural myth of the twentieth century. Brenda Denzler's comprehensive, clearly written and compelling narrative provides the first sustained overview and valuation of the UFO alien abduction movement as a social phenomenon positioned between scientific and religious perspectives. Demonstrating the unique place ufology occupies in the twentieth century nexus between science and religion, Denzler surveys the sociological contours of its community, assesses its persistent attempt to achieve scientific legitimacy and concludes with an examination of the movement's metaphysical or spiritual outlook. Her book is a substantial contribution to our understanding of American popular culture and the boundaries of American religion and to the debate about the nature of science and religion. Denzler presents a thorough and fascinating history of the UFO abduction movement and traces the tensions between those who are deeply ambivalent about abduction narratives that seemingly erode their quest for scientific credibility and the growing cultural power of those who claim to have been abducted. She locates the phenomenon within the context of American religious history and using data gathered in surveys sheds new light on the social profile of these UFO communities. **The Lure of the Edge** succeeds brilliantly in repositioning a cultural phenomenon considered by many to be bizarre and marginal into a central debate about the nature of science, technology and the production of a modern myth.

The Encyclopedia of Alien Encounters Alan Baker, 1999 Containing over 500 entries, this historical reference work provides an A-Z of alien and non-human encounters. It details the events, encounters, personalities and theories that have created this field of human experience and inquiry.

Out of Phase: Encounter Ivan Peraza, 2024-04-09 This book is a sci-fi novel about the not-so-distant future when humankind lives peacefully under a world government. Humans have built space stations and colonized the Moon and Mars. Mining has been moved to the asteroid belt. I wrote this story from the point of view of the scientists who participated in the discovery. It is not about conflict but about processes and tribulations as the scientists bring their discoveries to the higher ups.

Alien Abduction in the Cinema Paul Meehan, 2023-08-03 The alien abduction phenomenon is one of the enduring enigmas of our time. While the reality of alien abductions is a hotly debated topic among UFO researchers, scientists, skeptics and true believers alike, the phenomenon indisputably exists as an artifact of popular culture. This book analyzes more than 75 films that draw their inspiration from allegedly fact-based accounts of alien contact from 1951's *The Man from Planet X* to *Contact* in 2021. These films are examined in terms of both their cinematic qualities

and their exploration of thematic elements derived from abduction reports Abduction motifs that appear in science fiction classics such as *The Day the Earth Stood Still* 2001 and *Close Encounters* are analyzed as well as those in lesser known films like *The Stranger Within* *Starship Invasions* *Dark Skies* and *Proximity* Special attention is given to movies based on the famed experiences of abductees Betty and Barney Hill Whitley Strieber and Travis Walton The book also addresses skeptical theories about the origins of the phenomenon in science fiction and examines an uncanny prescience that appears to anticipate these inexplicable occurrences

Alien Agency Chris Salter, 2023-10-31 An investigation into what happens in creative practice when the materials of art and research behave and perform in ways beyond the creators intentions In *Alien Agency* Chris Salter tells three stories of art in the making Salter examines three works in which the materials of art the stuff of the world behave and perform in ways beyond the creator s intent becoming unknown surprising alien Studying these works all three deeply embroiled in and enabled by science and technology allows him to focus on practice through the experiential and affective elements of creation Drawing on extensive ethnographic observation and on his own experience as an artist Salter investigates how researcher creators organize the conditions for these experimental performative assemblages assemblages that sidestep dichotomies between subjects and objects human and nonhuman mind and body knowing and experiencing Salter reports on the sound artists Bruce Odland and Sam Auinger O A and their efforts to capture and then project unnoticed urban sounds tracks the multi year project TEMA Tissue Engineered Muscle Actuators at the art research lab SymbioticA and its construction of a hybrid semi living machine from specially grown mouse muscle cells and describes a research creation project which he himself initiated that uses light vibration sound smell and other sensory stimuli to enable audiences to experience other cultures ways of sensing Combining theory diary history and ethnography Salter also explores a broader question How do new things emerge into the world and what do they do
