Doctrine of the Trinity Stephen Nye, 1694 **A Religious Encyclopaedia Or Dictionary of Biblical, Historical, Doctrinal, and Practical Theology** Johann Jakob Herzog, Philip Schaff, 1882 *A New and Corrected Version of the New Testament; Or, a Minute Revision of the Original Memoirs, Letters, Prophecies and Other Productions of the Evangelists and Apostles; To which are Subjoined a Few, Generally Brief, Critical, Explanatory, and Practical Notes. By Rodolphus Dickinson. [With a Portrait.]*, 1833 The Word as word Michael Straus, 2024-09-12 This book provides an original translation methodology applicable to the New Testament one that remains rooted in the literal Greek considers its paleographic and philological characteristics as well as its socio historical context understands the text as part of a canonical whole reflects its reception history in church doctrine and liturgy accounts for classical formulations of its translation tradition yet speaks with contemporary literary style In developing a new methodology the book appropriates ancient and modern insights into the relationship of thought and language not previously considered in the context of translation Further the book is premised on the understanding that Scripture is the divinely communicated Word of God made incarnationally present in the words of the Bible As the viva vox evangelii biblical texts thus have ongoing effects in the continuum of church history and tradition The book argues that contemporary translators of the Bible should therefore be aware of their own situatedness in and shaping by this continuity of linguistic and cultural transmission As such the book provides a pathway to translating the Scriptures in such a way as to capture recapitulate and incorporate the living sweep of the timeless Word in words that cross time

Charles Darwin and the Church of Wordsworth Robert M. Ryan, 2016 Charles Darwin and the Church of William Wordsworth is a study of the cultural connections between two of the nineteenth century's most influential figures Charles Darwin and William Wordsworth When Darwin published *On the Origin of Species* his reading public's affective response to the natural world had already been profoundly influenced by William Wordsworth Wordsworth presented nature as benign harmonious a source of moral inspiration and spiritual blessing and a medium through which one might enter into communion with the Divine Long after his death he continued to be revered throughout the English speaking world not only as a great poet but as a theologian with a broader following than any prelate and an appeal that transcended or ignored sectarian differences For believers and skeptics alike Wordsworth's poetry offered a readily accessible and intellectually respectable counterweight to Darwin's vision of a material universe evolving by fixed laws in which Divinity played no discernible role and where concepts like beauty and harmony were material conditions to be explained in scientific terms Wordsworth's theology of nature became for many readers a more effective counterforce to Darwin's ideas than Biblical orthodoxy but it also provided an enriching context for the reception of evolutionary theory aiding theists in their effort to reach an accommodation with the new science As the nineteenth century's two most prominent theoreticians of nature's life Wordsworth and Darwin competed for attention among those seeking to understand humanity's relationship with the natural world and their disciples engaged in a productive mutually transformative dialogue in which the poet's cultural authority

influenced the way Darwin was received and Darwinian science adjusted interpretation and evaluation of the poetry Charles Darwin and the Church of William Wordsworth explores the broad cultural relationship between Wordsworth Darwin and their disciples contextualizing them within wider discussions about the relationship between religion and science in the nineteenth century
