Urban Revitalization Carl Grodach, Renia Ehrenfeucht, 2015-12-22 Following decades of neglect and decline many US cities have undergone a dramatic renaissance From New York to Nashville and Pittsburgh to Portland governments have implemented innovative redevelopment strategies to adapt to a globally integrated post industrial economy and cope with declining industries tax bases and populations However despite the prominence of new amenities in revitalized neighborhoods spectacular architectural icons and pedestrian friendly entertainment districts the urban comeback has been highly uneven Even thriving cities are defined by a bifurcated population of creative class professionals and a low wage low skilled workforce Many are home to diverse and thriving immigrant communities but also contain economically and socially segregated neighborhoods They have transformed high profile central city brownfields but many disadvantaged neighborhoods continue to grapple with abandoned and environmentally contaminated sites As urban cores boom inner ring suburban areas increasingly face mounting problems while other shrinking cities continue to wrestle with long term decline The Great Recession brought additional challenges to planning and development professionals and community organizations alike as they work to maintain successes and respond to new problems It is crucial that students of urban revitalization recognize these challenges their impacts on different populations and the implications for crafting effective and equitable revitalization policy Urban Revitalization Remaking Cities in a Changing World will be a guide in this learning process This textbook will be the first to comprehensively and critically synthesize the successful approaches and

pressing challenges involved in urban revitalization The book is divided into five sections In the introductory section we set the stage by providing a conceptual framework to understand urban revitalization that links a political economy perspective with an appreciation of socio cultural factors in explaining urban change Stemming from this we will explain the significance of revitalization and present a summary of the key debates issues and conflicts surrounding revitalization efforts Section II will examine the historical causes for decline in central city and inner ring suburban areas and shrinking cities and building from the conceptual framework discuss theory useful to explain the factors that shape contemporary revitalization initiatives and outcomes Section III will introduce students to the analytical techniques and key data sources for urban revitalization planning Section IV will provide an in depth critical discussion of contemporary urban revitalization policies strategies and projects This section will offer a rich set of case studies that contextualize key themes and strategic areas across a range of contexts including the urban core central city neighborhoods suburban areas and shrinking cities Lastly Section V concludes by reflecting on the current state of urban revitalization planning and the emerging challenges the field must face in the future Urban Revitalization will integrate academic and policy research with professional knowledge and techniques Its key strength will be the combination of a critical examination of best practices and innovative approaches with an overview of the methods used to understand local situations and urban revitalization processes A unique feature will be chapter specific case studies of contemporary urban revitalization projects and questions geared toward generating classroom discussion around key issues The book will be written in an accessible style and thoughtfully organized to provide graduate and upper level undergraduate students with a comprehensive resource that will also serve as a reference guide for professionals

The Art of Classic Planning Nir Haim Buras, 2020-01-28 An accomplished architect and urbanist goes back to the roots of what makes cities attractive and livable demonstrating how we can restore function and beauty to our urban spaces for the long term Nearly everything we treasure in the world's most beautiful cities was built over a century ago Cities like Prague Paris and Lisbon draw millions of visitors from around the world because of their exquisite architecture walkable neighborhoods and human scale Yet a great deal of the knowledge and practice behind successful city planning has been abandoned over the last hundred years not because of traffic population growth or other practical hurdles but because of ill considered theories emerging from Modernism and reactions to it The errors of urban design over the last century are too great not to question The solutions being offered today sustainability walkability smart and green technologies hint at what has been lost and what may be regained but they remain piecemeal and superficial In *The Art of Classic Planning* architect and planner Nir Haim Buras documents and extends the time tested and holistic practices that held sway before the reign of Modernism With hundreds of full color illustrations and photographs that will captivate architects planners administrators and developers *The Art of Classic Planning* restores and revitalizes the foundations of urban planning Inspired by venerable cities like Kyoto Vienna and Venice and by the great successes of L'Enfant's Washington Haussmann's Paris and Burnham's Chicago Buras

combines theory and a host of examples to arrive at clear guidelines for best practices in classic planning for today's world. The Art of Classic Planning celebrates the enduring principles of urban design and invites us to return to building beautiful cities.

Retrofitting Sprawl Emily Talen, 2015. These twelve new essays present innovative and practical ideas for addressing the harmful effects of sprawl. Sprawl is not only an ongoing focus of specialized magazines like *Dwell*; indeed, *Time* magazine has cited recycling the suburbs as the second of Ten Ideas Changing the World Right Now. While most conversations on sprawl tend to focus on its restriction, this book presents an overview of current thinking on ways to fix, repair, and retrofit existing sprawl. Chapters by planners, geographers, and architects present research grounded in diverse locales including Phoenix, Arizona; Seattle; Washington; Dublin, Ohio; and the Atlanta, Georgia, and Washington, D.C. metro areas. The authors address head-on the most controversial aspects of sprawl: issues of power and control, justice and equity, and American attitudes about regulating private development. But they also put these issues in practical contexts, bringing in examples of redesign that are already occurring around the country, including the retrofitting of corridors and the repurposing of the cul-de-sac. Whether fixing sprawl requires a cultural shift in thinking or a coordinated effort by local government, these essays testify that a combination of forethought and creativity will be needed.

Interplaces Nicholas A. Phelps, 2017. Much of the world's economic activity takes place in between cities and nations, the geographical containers that we have taken for granted for hundreds of years now. In this book, Nicholas Phelps provides a guide to this uncharted territory within urban and economic geography. He highlights the importance of intermediary actors and processes in shaping this economy in between. From the airports, shopping malls, and office parks that have sprung up on the road between cities to the work done on the move in cars and trains to the decisions made by internationally mobile networks of experts in conferences and negotiations, the geography of the economy in between is revealed as one involving four recurring and coexisting economic geographical formations: the agglomeration, the enclave, the networks, and the arena. Phelps sets out a multidisciplinary perspective and agenda on the question of how, why, and where much contemporary economic activity takes place.

An Anatomy of Sprawl Nicholas A. Phelps, 2013-03-01. Despite the combined efforts of British planners, politicians, the public, and interest groups, the Solent City stands as one of a number of instances of a peculiar instance of urban sprawl: muted and slow to emerge yet produced paradoxically by very strong interests in promoting conservation and restraint. This unique and valuable case study, while focusing on the planning and development of South Hampshire in particular, enables an in-depth study of the issues surrounding planning strategies with regards to growing populations.
