 the authors explore the issues inherent in developing sustainable transportation They review the types of propulsion systems
 and vehicle options discuss low carbon fuels and alternative energy sources and examine the role of regulation in curbing
 emissions All technologies have an impact on the environment from internal combustion engine vehicles to battery electric
 vehicles fuel cell electric vehicles and hybrids there is no silver bullet The battery electric vehicle may seem the obvious path
 to a sustainable carbon free transportation future but it s not the only nor necessarily the best path forward The vast majority
 of vehicles today use the internal combustion engine ICE and this is unlikely to change anytime soon Improving the ICE and
 its fuels entering a new ICE age must be a main route on the road to zero emissions How do we go green The future requires
 a balanced approach to transportation It s not a matter of choosing between combustion or electrification it s combustion and
 electrification As the authors say The future is eclectic By harnessing the best qualities of both technologies we will be in the
 best position to address our transportation future as quickly as possible ISBN 9781468601466 ISBN 9781468601473 ISBN
