

Your Temperature Indicator shows the temperature of the coolant in your engine. Normally, the pointer will rest at the left end of the center bar. If it swings too far towards "H," stop the engine. Never add water to your engine if it's overheated. Wait until it's cooled.

Your Speedometer has a large, easy-to-read dial so you can keep a close check on your driving speeds. Your total car mileage indicator is in the center of the instrument face.

Your High-Beam Light Indicator is on the lower right side of the speedometer face. When the indicator shows red, it'll remind you that your headlights are in high-beam position.

Your Directional Signal Light is located on the lower left side of the speedometer face. It flashes a green warning light for you whenever your directional lights are operating.

your convenient Dodge controls

Your Clutch Pedal . . . When you press the clutch pedal to the floor, you disengage your clutch with the engine. Remember, there should always be one inch of free movement in your clutch pedal. Try not to "ride" the clutch because it causes a lot of wear on clutch parts. The new Dodge PowerFlite eliminates the clutch pedal since this operation is performed in its fully automatic transmission.

Your Brake Pedal—You'll find the brakes in your car sensitive to the lightest pedal pressure. However, if pedal travel should ever become excessive, see your friendly Dodge Dealer for a brake adjustment. It'll pay you dividends in safety!

Your Accelerator Pedal—You control the engine speed of your car with this pedal. We've designed the pedal to lessen leg and foot fatigue on long drives, yet always give you positive control of car speed. Try not to "tramp" on the accelerator pedal while waiting for traffic signals, as this wastes gas.

Your Headlight Dimmer Switch—Just press the dimmer switch to transfer headlights from "high" to "low" beam. Don't forget to practice driving courtesy at night—lower the beam for oncoming cars.

Your Seat Adjustment—Just lift the seat release lever on the left side of the front seat to move the seat forward or backward. You will note the seat rises as it moves forward. This gives better visibility for the driver who needs to be closer to the foot controls.
