An Introduction to Algorithmic Trading Edward Leshik, Jane Cralle, 2011-04-04 Interest in algorithmic trading is growing massively it s cheaper faster and better to control than standard trading it enables you to pre think the market executing complex math in real time and take the required decisions based on the strategy defined We are no longer limited by human bandwidth The cost alone estimated at 6 cents per share manual 1 cent per share algorithmic is a sufficient driver to power the growth of the industry According to consultant firm Aite Group LLC high frequency trading firms alone account for 73% of all US equity trading volume despite only representing approximately 2% of the total firms operating in the US markets Algorithmic trading is becoming the industry lifeblood But it is a secretive industry with few willing to share the secrets of their success The book begins with a step by step guide to algorithmic trading demystifying this complex subject and providing readers with a specific and usable algorithmic trading knowledge It provides background information leading to more advanced work by outlining the current trading algorithms the basics of their design what they are how they work

how they are used their strengths their weaknesses where we are now and where we are going The book then goes on to demonstrate a selection of detailed algorithms including their implementation in the markets Using actual algorithms that have been used in live trading readers have access to real time trading functionality and can use the never before seen algorithms to trade their own accounts The markets are complex adaptive systems exhibiting unpredictable behaviour As the markets evolve algorithmic designers need to be constantly aware of any changes that may impact their work so for the more adventurous reader there is also a section on how to design trading algorithms All examples and algorithms are demonstrated in Excel on the accompanying CD ROM including actual algorithmic examples which have been used in live trading
