All About Me Child Template For Kids:

Communication Tools for Working with Traumatized Children and Teens Richard Rose, 2025-02-21 This expert guide provides 50 essential tools and activities to use in practice with children and young people who have experienced trauma. From bubbles, balloons and blocks to ghosts, monsters and squiggles, this book offers a wealth of activities that help children to express their feelings and experiences while feeling safe and supported. Case studies demonstrate how each activity can be easily incorporated into daily interactions during social work practice and clear explanations of the theory provide context for how they work. Developed from decades of hands-on experience supporting children after trauma, this book demonstrates ways to sensitively discuss children's histories. This can lead into discussing the way their experiences influence their behaviour and help them to form healthy attachments for the future.

Mothering and Archaeology Laura Seifert, Suzanne M. Spencer-Wood, 2025-03-21 *Mothering and Archaeology* brings to light new insights connecting mothering in the past and present by exploring all aspects of this important but frequently under-valued and thus neglected subject and is underpinned by feminist theorizing of motherhood and mothering. Taking a comprehensive approach, this book explores the archaeology of mothers in private and public places in the past and present, the patriarchal institution of motherhood versus actual mothering practices, the burdens and joys of mothering in archaeology and the second shift often pressed upon women. With the inclusion of intersectional research on diverse historic ideologies and practices of motherhood and mothering that varied among classes, races and ethnic groups, the book also spans a wide range of temporal, geographic and cultural differences around the world, from Ancient Egypt and Iron Age Europe to Aztec Mexico, colonial Yucatan, colonial and historic Europe, America and Australia, and modern archaeologists in America and Europe. Going beyond historical practices, the book also examines how female identifying archaeologists usually perform a disproportionate amount of mothering labor, particularly emotional labor, both in their careers and in the home. Further, it also addresses how becoming a mother affects women's archaeological practices and careers and discusses why women are doing most of the deeply engaged community archaeology with all of its additional relationships and social navigation of emotional labor. Bringing together research on motherhood and mothering in the past with women's contemporary experiences of the relationships of mothering to archaeology, this book provides new insights to researchers in archaeology, anthropology, public history and women's studies.

Observing Children with Attachment Difficulties in School Kim S. Golding, Jane Fain, Cathy Mills, Helen Worrall, Ann Frost, 2012 An observational tool designed to help structure observations of children aged 5-11 with attachment issues in school. Simple checklists and diagrams help to identify emotional and behavioural problems and handouts with activities are provided to provide emotional support and identify appropriate interventions.

Observing Children with Attachment Difficulties in Preschool Settings Kim S. Golding, Jane Fain, Ann Frost, Sian Templeton, Eleanor Durrant, 2012-11-01 For preschool children with emotional difficulties arising from difficulties in attachment, standard observations used in early

years settings are not always helpful in identifying their problems and providing guidance on how they can be helped. Combining an accessible introduction to attachment and child development with a child observation tool for identifying behavior and the emotional needs underlying this behavior, this book enables early years professionals to identify problems and provide appropriate support. Case study boxes help to illustrate typical patterns of attachment and all aspects of behavior are covered, including play interaction with peers, neediness and aggression. A range of handouts and activities is included and guidance provided on how to work within professional boundaries. Written in clear, concise language, *Observing Preschool Children with Attachment or Emotional Difficulties* aims to equip the reader with the knowledge and skills needed to identify and support children's emotional and social difficulties. Suitable for use with children aged 2-5, this guide will be an invaluable resource for early years professionals as well as for use by clinicians, teachers and learning support staff.

Coaching Parents of Young Children with Autism Sally J. Rogers, Laurie A. Vismara, Geraldine Dawson, 2021-04-20. A growing body of evidence supports the benefits of high quality parent interventions for building social and communication skills in 0 to 5 year olds with autism spectrum disorder (ASD). How can clinicians coach parents to effectively incorporate learning opportunities into daily routines at home? From preeminent experts, this practical book explores the role of the coach and reviews the 'whats, whys and how-tos' of successful collaboration with parents. Topics include structuring coaching sessions, identifying children's needs, facilitating playful engagement and deepening parents' understanding of how they can boost skills development during everyday activities. Seventeen reproducible handouts and forms include the multipage P-ESDM Infant Toddler Curriculum Checklist, ideal for use in telehealth assessments. Purchasers get access to a webpage where they can download and print the reproducible materials in a convenient 8 1/2 x 11 size.

The Place of Narrative in the Early Years Curriculum Peter Baldock, 2006-08-21. Delving deeper into the understanding that young children have of stories, this book demonstrates how narrative competence develops in the first eight years of life and how this can be reflected in practice.

Sentence Processing Roger P. G. van Gompel, 2013-09-11. What are the psychological processes involved in comprehending sentences? How do we process the structure of sentences and how do we understand their meaning? Do children, bilinguals and people with language impairments process sentences in the same way as healthy monolingual adults? These are just some of the many questions that sentence processing researchers have tried to answer by conducting ever more sophisticated experiments, making this one of the most productive and exciting areas in experimental language research in recent years. This book is the first to provide a comprehensive state-of-the-art overview of this important field. It contains 10 chapters written by world-leading experts which discuss influential theories of sentence processing and important experimental evidence, with a focus on recent developments in the area. The chapters also analyse research that has investigated how people process the structure and meaning of sentences and how sentences are understood within their context. This comprehensive and authoritative work will appeal to students and researchers in the field of sentence

processing as well anyone with an interest in psychology and linguistics

Small-Scale Research in Primary Schools

Kimberly Safford, Mary Stacey, Roger Hancock, 2013-09-13 Small scale Research in Primary Schools provides guidance and inspiration for students and practitioners undertaking practical investigations and workplace enquiry in the primary school. The 30 chapters are carefully selected to illustrate a range of approaches to educational enquiry and are particularly relevant to the range of practitioners who may carry out school based research as part of a course of study teachers trainee and newly qualified teachers teaching assistants learning mentors and staff who support children with individual needs. Research topics addressed in chapters include children's learning in the core curriculum subjects as well as themes central to teaching and learning. Important concepts and terminology are highlighted throughout. More specifically areas of research explored include Play Special Educational Needs Working with parents and families English as an Additional Language Creativity Language development Learning environments. Small scale Research in Primary Schools provides a straightforward highly accessible introduction to enquiry approaches and research methodologies and the questions and challenges adults in schools encounter about children's learning. It shows how small scale research in primary education can impact on professional thinking and learning. It aims to provide constructive support for students and practitioners in extending their knowledge and understanding through workplace enquiry.

EMDR and The Art of Psychotherapy With Children

Carolyn Settle, Robbie Adler-Tapia, 2008-06-16 This book contains invaluable material for the child therapist with varied theoretical backgrounds to more confidently apply EMDR to children. Frances Klaff for Journal of EMDR Practice and Research Volume 3 Number 3 2009 In this book the authors present an overview of how therapists can get started in conceptualizing psychotherapy with Eye Movement Desensitization and Reprocessing EMDR methodology through Adaptive Information Processing AIP theory. The focus of the book is to teach therapists to effectively use the entire EMDR protocol with young children. The first chapter provides a comprehensive overview of how to get started with EMDR after completing basic training. The book continues with chapters that detail the basic skills in using EMDR with children and then transitions to more advanced skills in using EMDR with children with specific diagnosis and presenting issues. They follow with a chapter summarizing the published evidence to date supporting the practice of EMDR with children. Data is then incorporated into a chapter summarizing their research on EMDR with young children in order to provide evidence of therapists ability to adhere to the EMDR protocol with children and to document their research findings about training therapists to use EMDR with children. Finally they conclude the book with goals for the future of EMDR with children while encouraging therapists to consider conducting research in order to compel the practice of EMDR with children into the mainstream of child psychotherapy. It is a major task of the book to inspire therapists to begin thinking about conducting research and how important research is to therapists in order to validate and advance the practice of psychotherapy. In the end the most significant goal of this book is to provide best practice for children who are in need of expert psychotherapy in order to

change the trajectory of their lives The hope is to provide guidance and support to therapists in order to launch them in their practice of EMDR This is the art of treating children with EMDR **EMDR and the Art of Psychotherapy With Children**
