Resources in Education ,2001 The Zimbabwe Science News ,1991 International Handbook of Mathematical Learning Difficulties Annemarie Fritz,Vitor Geraldi Haase,Pekka Räsänen,2019-01-30 This comprehensive volume provides teachers researchers and education professionals with cutting edge knowledge developed in the last decades by the educational behavioural and neurosciences integrating cognitive developmental and socioeconomic approaches to deal with the problems children face in learning mathematics The neurocognitive mechanisms and the cognitive processes underlying acquisition of arithmetic abilities and their significance for education have been the subject of intense research in the last few decades but the most part of this research has been conducted in non applied settings and there s still a deep discrepancy between the level of scientific knowledge and its implementation into actual educational settings Now it s time to bring the results from the laboratory to the classroom Apart from bringing the theoretical discussions to educational settings the volume presents a wide range of methods for early detection of children with risks in mathematics learning and strategies to develop effective interventions based on innovative cognitive test instruments It also provides insights to translate research knowledge into public policies in order to address socioeconomic issues And it does so from an international perspective dedicating a whole section to the cultural diversity of mathematics learning difficulties in different parts of the world All of this makes the International Handbook of Mathematical Learning Difficulties an essential tool for those involved in the daily struggle to prepare the future generations to succeed in the global knowledge society

Macroeconomic and Structural Adjustment Policies in Zimbabwe Clever Mumbengegwi,2001-12-17 The policy relevant analysis of this volume examines nearly twenty years of Zimbabwe s macroeconomic and structural adjustment experiences since independence Part One analyses the impact on economic growth inflation employment and labour markets Part Two deals with financial liberalization and the financial turmoil and currency crisis experienced in the wake of reforms Part Three examines trade liberalization and its impact on investment and income distribution Part Four gives sectoral perspectives on the agricultural manufacturing and health sectors *Christian Warfare in Rhodesia-Zimbabwe* Norman H Murdoch,2015-07-30 Christian Warfare in Rhodesia Zimbabwe takes a hard look at the history of the Salvation Army in Rhodesia Zimbabwe and its long history with both the government and the rest of the church Norman H Murdoch examines in depth the parallels between the events of the First Chimurenga an uprising against European occupation in 1896 97 and the Second Chimurenga in the 1970s the civil war that led to majority rule At the time of the first the Salvation Army was barely established in the country by the second it was fully entrenched in the ruling class Murdoch explores the collaboration

of this Christian mission with the institutions of white rule and the painful process of disentanglement necessary by the late twentieth century Stories of martyrdom and colonial mythology are set in the carefully researched context of ecumenical relations and the Salvation Army's largely unknown and seldom accessible internal politics

The African Mother Tongue and Mathematical Ideas Abdul Karim Bangura, 2020-06-02 This book by renowned scholar Dr Abdul Karim Bangura combines linguistics and mathematics to show how and why African centred mathematical ideas can be a driving force in Africa's development efforts Bangura explores the concept that Africa has been the centre of the History of Mathematics for thousands of years as the civilizations that emerged across the continent developed contributions which would enrich both ancient and modern understanding of nature through mathematics However scholars and other professionals working in the field of mathematics education in Africa have identified a plethora of issues in carrying out their tasks This is highlighted by one of the most compelling arguments in the book which is that a major reason for these problems is the fact that the African mother tongues has been greatly neglected in the teaching of mathematics in the continent Bangura asserts that a change has to be made in order for Africa to benefit from the exceptional opportunities mathematics offer showing that even if there is a great body of work connecting linguistics and mathematics few analyses have been performed on the link between African languages and mathematics and the ones that have been made are not theoretically grounded on linguistics Thus the book begins by identifying the objects of study of linguistics and mathematics and delineates which ones they have in common Next since the object of study of linguistics is language the nine design features of language are employed to examine each of the objects as it pertains to African languages After that mathematical ideas of sustainability and those of tipping points are suggested as means to help Africa's development efforts
