

JANUARY ... DOES IT BRING YOU JOY?

- 1 January is the time for renewal on many fronts. It's the time of the year to re-evaluate everything. If something or someone doesn't bring you joy, it's pretty pointless carrying on with it. If we want the best, we must do our best. We must keep our family space safe and secure so that we are thriving as a people and as a nation. 5
- 2 In order to live their best lives, people are spreading themselves thinner and thinner with multiple streams of income. In the process we earn more but live less, we lose our focus of what is important.
- 3 With social media, keeping up with other Instagrammers are having a devastating effect on self-perception. Everything appears to be real perfect, but the fabric of our society is frazzled. Use January to take stock and start navigating new ways of doing things. Instead of multiple streams of sole sessions, travel more, and connect with people and places that bring you joy. 10

threatening its legacy as a champion in leveraging agriculture for development This paper examines how a changing climate may affect rice production and how Vietnamese farmers are likely to adapt to various climatic conditions using an innovative yield function approach taking into account sample selection bias and endogeneity of inputs Model results suggest that although climate change can potentially reduce rice production farmers will respond mainly by adjusting the production portfolio and levels of input use However investments in rural infrastructure and human capital will have to support farmers in the adaptation process if production levels and farm incomes are to be sustained in the future **Leveraged** Moritz Schularick, 2022-12-13 An authoritative guide to the new economics of our crisis filled century Published in collaboration with the Institute for New Economic Thinking The 2008 financial crisis was a seismic event that laid bare how financial institutions instabilities can have devastating effects on societies and economies COVID 19 brought similar financial devastation at the beginning of 2020 and once more massive interventions by central banks were needed to heed off the collapse of the financial system All of which begs the question why is our financial system so fragile and vulnerable that it needs government support so often For a generation of economists who have risen to prominence since 2008 these events have defined not only how they view financial instability but financial markets more broadly Leveraged brings together these voices to take stock of what we have learned about the costs and causes of financial fragility and to offer a new canonical framework for understanding it Their message the origins of financial instability in modern economies run deeper than the technical debates around banking regulation countercyclical capital buffers or living wills for financial institutions Leveraged offers a fundamentally new picture of how financial institutions and societies coexist for better or worse The essays here mark a new starting point for research in financial economics As we muddle through the effects of a second financial crisis in this young century Leveraged provides a road map and a research agenda for the future *Foundations of Nursing in the Community* Marcia Stanhope, RN, DSN, FAAN, Jeanette Lancaster, RN, PhD, FAAN, 2013-10-21 With concise focused coverage of community health nursing Foundations of Nursing in the Community Community Oriented Practice 4th Edition provides essential information for community practice from nursing roles and care settings to vulnerable population groups The book uses a practical community oriented approach and places an emphasis on health promotion and disease prevention Practical application of concepts is highlighted throughout the text in case studies critical thinking activities QSEN competencies and Healthy People 2020 objectives Evidence Based Practice boxes highlight current research findings their application to practice and how community public health nurses can apply the study results Levels of Prevention boxes identify specific nursing interventions at the primary secondary and tertiary levels to reinforce the concept of prevention as it pertains to community and public health care Focus on health promotion throughout the text emphasizes initiatives strategies and interventions that promote the health of the community Clinical Application scenarios offer realistic situations with questions and answers to help you apply chapter concepts to practice in the community Case Studies provide client

Filling the learning gap in program implementation using participatory monitoring and evaluation Elias Zerfu, Sindu W. Kebede, 2013-03-29 This study is motivated by the idea that even though participatory monitoring and evaluation PM E is widely accepted as a tool to manage development programs to be effective its application is widely constrained by its high start up resource requirements in terms of both finance and time However this paper argues that after the initial investment is made the payback from using PM E is much higher both in terms of grassroots level learning empowerment and capacity building and in terms of higher level strategic decision making which enhances impact This is demonstrated using field level experience of implementing PM E in farmer field schools FFSs under the Agricultural Services Support Program and Agricultural Sector Development Program Livestock ASSP ASDP L program in Zanzibar Tanzania After describing the major steps followed in designing and implementing a PM E for FFSs the major lessons learned and challenges faced in the process are discussed The study found out that PM E has enabled the tracking of technology uptake and reasons behind adoption and nonadoption of technologies through detailed data collection This informed and improved decision making at a higher level to design feasible methods to scale up adoption at other FFSs and to devise solutions for nonadoption The need for incentives to undertake PM E was found to be one of the major challenges of implementation among others

Lipid Signalling in Plant Development and Responses to Environmental Stresses Eric Ruelland, Olga Valentova, 2016-08-09 In response to environmental stresses or during development plant cells will produce lipids that will act as intracellular or intercellular mediators Glycerophospholipid and or sphingolipid second messengers resulting from the action of lipid metabolizing enzymes e g lipid kinases or lipases are commonly found within cells The importance of such mediating lipids in plants has become increasingly apparent Responses to biotic and abiotic stresses and to plant hormones all appear to involve and require lipid signals Likewise developmental processes in particular polarized growth seem also to involve signalling lipids Amongst these lipids phosphatidic acid PA has received the most attention It can be produced by phospholipases D but also by diacylglycerol kinases coupled to phospholipases C Proteins that bind phosphatidic acid and for which the activity is altered upon binding have been identified Furthermore other lipids are also important in signalling processes PA can be phosphorylated into diacylglycerol pyrophosphate and plants are one of the first biological models where the production of this lipid has been reported and its implication in signal transduction have been demonstrated PA can also be deacylated into lyso phosphatidic acid The phosphorylated phosphatidylinositols i e the phosphoinositides can act as substrate of phospholipases C but are also mediating lipids per se since proteins that bind them have been identified Other important lipid mediators belong to the sphingolipid family such the phosphorylated phytosphingosine or long chain bases Many questions remain unanswered concerning lipid signalling in plants Understanding and discussing current knowledge on these mechanisms will provide insights into plant mechanisms in response to constraints either developmental or environmental
