Office for Budget Responsibility Office for Budget Responsibility, 2011-11-29 This economic and fiscal outlook sets out the Office for Budget Responsibility OBR forecast for the period to 2016/17 The economy has grown less strongly than forecast in March primarily because higher than expected inflation has squeezed household incomes and consumer spending The eurozone crisis has impacted on business and consumer confidence Consequently the OBR has revised its growth forecasts downwards It expects the underlying momentum of the economy to pick up through 2012 but with the headline measure of GDP broadly flat until the second half The central forecast is now for 0.7 per cent growth in GDP in 2010/2011 2.1 per cent in 2013 2.7 per cent in 2014 and 3 per cent in 2015 and 2016 Public sector net borrowing PSNB is expected to total 127 this year 8.4 per cent of GDP but the downward revision of growth forecasts means the deficit will shrink less quickly over the next five years with a forecast 53 billion PSNB 2.9 per cent of GDP in 2015/16 Unemployment is expected to rise further to 8.7 per cent in 2012 before falling back to 6.2 per cent by 2016 The OBR estimates that the Government has a roughly 60 per cent of meeting its mandate to balance the structural or cyclically adjusted current budget by 2016/17 The central economic

and fiscal forecasts assume that the euro area finds a way through its current crisis but a more disorderly outcome is clearly a significant risk
