Connelly, Asia Ivić Weiss, Walter Whiteley, 2014-06-11 This book contains recent contributions to the fields of rigidity and
symmetry with two primary focuses to present the mathematically rigorous treatment of rigidity of structures and to explore
the interaction of geometry algebra and combinatorics Contributions present recent trends and advances in discrete
geometry particularly in the theory of polytopes The rapid development of abstract polytope theory has resulted in a rich
theory featuring an attractive interplay of methods and tools from discrete geometry group theory classical geometry
hyperbolic geometry and topology Overall the book shows how researchers from diverse backgrounds explore connections
among the various discrete structures with symmetry as the unifying theme The volume will be a valuable source as an
introduction to the ideas of both combinatorial and geometric rigidity theory and its applications incorporating the surprising
impact of symmetry It will appeal to students at both the advanced undergraduate and graduate levels as well as post docs

critical examination of structure and form in design covering a range of topics of great value to students and practitioners
engaged in any of the specialist decorative arts and design disciplines The complexities of two dimensional phenomena are
explained and illustrated in detail while various three dimensional forms are also discussed In the context of the decorative
arts and design structure is the underlying framework and form the resultant visible two or three dimensional outcome of the
creative process Whether hidden or visually detectable in the final design structure invariably determines whether or not a
design is successful in terms of both its aesthetics and its practical performance Hann successfully identifies various
geometric concepts and presents and discusses a number of simple guidelines to assist the creative endeavours of both
accomplished and student practitioners teachers and researchers **Discrete Geometry** Andras Bezdek, 2003-02-04
