

Writing Equations using the S-O Process

The S-O Process is an organized method to help write equations and solve problems. The O's stand for **Observe**, **Organize**, **Operate**, **Optimize**, and **Output**. An example of this work is shown below.

Example Problem: The base of a rectangle is 11 centimeters longer than the height. If the perimeter is 58 centimeters, find the base and the height of the rectangle.

Observe/Organize: The shape is a rectangle, and we are looking at the perimeter.

Declare: The base is 21 centimeters, and the height is 8 centimeters.

If you do not write an equation, you can solve the problem by making more trials until you find the answer.
