Paulsen, A. Bauer, F.J.M. Smulders, 2023-08-07 Increased consumers demand for game meat is driven by various motivations In order to fulfil this demand for safe wholesome and nutritious meat management of wild game and establishment of adequate supply chains are required Identification and assessment of hazards of biological and non biological origin help to design and implement effective control measures This requires cooperation of the stakeholders of food safety authorities and scientists Game meat safety extends from the wildlife human interface to wildlife livestock interactions as regards transfer of pathogenic agents or transfer of residues Thus assurance of game meat hygiene is a multidisciplinary task and involves tackling a variety of safety and quality issues for a number of species under diverse living conditions and modes of harvesting This is reflected in the contents of this volume with 19 contributions on free living or farmed game and on invasive species namely the warthog in South Africa This volume is the third in a series on safety and quality assurance along the game meat chain following a from forest to fork approach Like its predecessors it is targeted at scientists in academia and industry graduate students as well as to governmental officials in veterinary public health and food safety **Novel Ecosystems** Richard J. Hobbs, Eric S. Higgs, Carol Hall, 2013-01-07 Land conversion climate change and species invasions are contributing to the widespread emergence of novel ecosystems which demand a shift in how we think about traditional approaches to conservation restoration and environmental management They are novel because they exist without historical precedents and are self sustaining Traditional approaches emphasizing native species and historical continuity are challenged by novel ecosystems that deliver critical ecosystems services or are simply immune to practical restorative efforts Some fear that by raising the issue of novel ecosystems we are simply paving the way for a more laissez faire attitude to conservation and restoration Regardless of the range of views and perceptions about novel ecosystems their existence is becoming ever more obvious and prevalent in today s rapidly changing world In this first comprehensive volume to look at the ecological social cultural ethical and policy dimensions of novel ecosystems the authors argue these altered systems are overdue for careful analysis and that we need to figure out how to intervene in them responsibly This book brings together researchers from a range of disciplines together with practitioners and policy makers to explore the questions surrounding novel ecosystems It includes chapters on key concepts and methodologies for deciding when and how to intervene in systems as well as a rich collection of case studies and perspective pieces It will be a valuable resource for researchers managers and policy makers interested in the

question of how humanity manages and restores ecosystems in a rapidly changing world A companion website with additional resources is available at www.wiley.com/go/hobbs/ecosystems *Forest Landscapes and Global Change* João C. Azevedo, Ajith H. Perera, M. Alice Pinto, 2014-07-11 Climate change urban sprawl abandonment of agriculture intensification of forestry and agriculture changes in energy generation and use expansion of infrastructure networks habitat destruction and degradation and other drivers of change occur at increasing rates They affect patterns and processes in forest landscapes and modify ecosystem services derived from those ecosystems Consequently rapidly changing landscapes present many new challenges to scientists and managers While it is not uncommon to encounter the terms global change and landscape together in the ecological literature a global analyses of drivers of change in forest landscapes and their ecological consequences have not been addressed adequately That is the goal of this volume an exploration of the state of knowledge of global changes in forested landscapes with emphasis on causes and effects and challenges faced by researchers and land managers Initial chapters identify and describe major agents of landscape change climate fire and human activities The next series of chapters address implications of changes on ecosystem services biodiversity conservation and carbon flux A chapter that describes methodologies of detecting and monitoring landscape changes is presented followed by chapter that highlights the many challenges forest landscape managers face amidst of global change Finally we present a summary and a synthesis of the main points presented in the book Each chapter will contain the individual research experiences of chapter authors augmented by review and synthesis of global scientific literature on relevant topics as well as critical input from multiple peer reviewers
