Finance and Development, June 2016

International Monetary Fund. External Relations Dept.,2016-05-31 This article profiles iconoclastic economist Dani Rodrik the Harvard professor whose warnings about the downsides of globalization proved prescient Rodrik has spent most of his professional life at Ivy League institutions He has a bachelor s degree from Harvard and master s and PhD degrees from Princeton followed by a teaching career at Harvard and Columbia Rodrik s warnings that the benefits of free trade were more apparent to economists than to others were prescient His skepticism about the benefits of unfettered flows of capital across national boundaries is now conventional wisdom His successful attack on the so called Washington Consensus of policies to generate economic growth has made governments and international organizations like the IMF and the World Bank admit that there are many policy recipes that can generate growth Rodrik s caution about financial globalization is now widely shared including at the IMF

Survival October-November 2020: Pandemics and politics The International Institute for Strategic Studies (IISS),2023-04-21 Survival the IISS s bimonthly journal challenges conventional wisdom and brings fresh often controversial perspectives on strategic issues of the moment In this issue Adam Roberts explores pandemics and politics through the ages arguing that trust in leadership is essential in the struggle against infectious diseases Rebecca Barber and Sarah Teitt contend that ASEAN should take a more activist approach to the Rohingya crisis to salvage its credibility Greg Austin assesses the strategic implications of China s weak cyber defences ystein Tunsj casts doubt on the prospect of the Arctic becoming a theatre of great power conflict And eight more thought provoking pieces as well as

Light, Paper, Process Virginia Heckert, 2015-04-14 From its beginnings photography has been shaped by the desire to understand and explore the essence of the medium Light Paper Process features the work of seven artists Alison Rossiter Marco Breuer James Welling Lisa Oppenheim Chris McCaw John Chiara and Matthew Brandt who investigate the possibilities of analog photography by finding innovative surprising and sometimes controversial ways to push light sensitive photographic papers and chemical processing beyond their limits A panoply of practices emerges in the work of these artists Some customize cameras with special lenses or produce images on paper without a camera or film Others load paper rather than film in the camera or create contact printing with sources of light other than the enlarger while still others use expired photographic papers and extraneous materials such as dust and sweat selected to match the particular subject of the photograph All of the artists share a willingness to embrace accident and chance Trial and error contribute to an understanding of the materials and their potential as do the attitudes of underlying curiosity and inventive interrogation The act of making each image is like a performance with only the photographer present The results are stunning This lavish publication accompanies an eponymous exhibition on view at the J Paul Getty Museum from April 14 to September 6 2015

Strategic Reassurance and Resolve James Steinberg, Michael E. O'Hanlon, 2015-08-25 How the United States and China can avoid future conflict and establish stable cooperative relations After forty years of largely cooperative Sino U S relations policymakers politicians and pundits on both sides of the Pacific see growing tensions between the United States and China Some go so far as to predict a future of conflict driven by the inevitable rivalry between an established and a rising power and urge their leaders to prepare now for a future showdown Others argue that the deep economic interdependence between the two countries and the many areas of shared interests will lead to more collaborative relations in the coming decades In this book James Steinberg and Michael O Hanlon stake out a third less deterministic position They argue that there are powerful domestic and international factors especially in the military and security realms that could well push the bilateral relationship toward an arms race and confrontation even though both sides will be far worse off if such a future comes to pass They contend that this pessimistic scenario can be

confidently avoided only if China and the United States adopt deliberate policies designed to address the security dilemma that besets the relationship between a rising and an established power The authors propose a set of policy proposals to achieve a sustainable relatively cooperative relationship between the two nations based on the concept of providing mutual strategic reassurance in such key areas as nuclear weapons and missile defense space and cyber operations and military basing and deployments while also demonstrating strategic resolve to protect vital national interests including in the case of the United States its commitments to regional allies

The Violence of Austerity

Vickie Cooper, David Whyte, 2017-05-20 Austerity a response to the aftermath of the financial crisis continues to devastate contemporary Britain In The Violence of Austerity Vickie Cooper and David Whyte bring together the voices of campaigners and academics including Danny Dorling Mary O Hara and Rizwaan Sabir to show that rather than stimulating economic growth austerity policies have led to a dismantling of the social systems that operated as a buffer against economic hardship exposing austerity to be a form of systematic violence Covering a range of famous cases of institutional violence in Britain the book argues that police attacks on the homeless violent evictions in the rented sector the risks faced by people on workfare schemes community violence in Northern Ireland and cuts to the regulation of social protection are all being driven by reductions in public sector funding The result is a shocking expose of the myriad ways in which austerity policies harm people in Britain

Reconceptualising Global Finance and its Regulation Ross P. Buckley, Emiliós Avgouleas, Douglas W.

Arner, 2016-03-11 The current global financial system may not withstand the next global financial crisis In order to promote the resilience and stability of our global financial system against future shocks and crises a fundamental reconceptualisation of financial regulation is necessary This reconceptualisation must begin with a deep understanding of how today's financial markets regulatory initiatives and laws operate and interact at the global level This book undertakes a comprehensive analysis of such diverse areas as regulation of financial stability modes of supply of financial services market infrastructure fractional reserve banking modes of production of global regulatory standards and the pressing need to reform financial sector ethics and culture Based on this analysis Reconceptualising Global Finance and its Regulation proposes realistic reform initiatives which will be of primary interest to regulatory and banking legal practitioners policy makers scholars research students and think tanks

Future Spacecraft Propulsion Systems and Integration Paul A. Czysz, Claudio

Bruno, Bernd Chudoba, 2017-08-30 The updated and expanded third edition of this book focuses on the multi disciplinary coupling between flight vehicle hardware alternatives and enabling propulsion systems It discusses how to match near term and far term aerospace vehicles to missions and provides a comprehensive overview of the subject directly contributing to the next generation space infrastructure from space tourism to space exploration This holistic treatment defines a mission

portfolio addressing near term to long term space transportation needs covering sub orbital orbital and escape flight profiles
In this context a vehicle configuration classification is introduced covering alternatives starting from the dawn of space
access A best practice parametric sizing approach is introduced to correctly design the flight vehicle for the mission This
technique balances required mission with the available vehicle solution space and is an essential capability sought after by
technology forecasters and strategic planners alike
