The Modernist City James Holston, 1989-09-08 The utopian design and organization of Brasilia the modernist new capital of Brazil were meant to transform Brazilian society In this sophisticated pioneering study of Brasilia from its inception in 1957 to the present James Holston analyzes this attempt to change society by building a new kind of city and the ways in which the paradoxes of constructing an imagined future subvert its utopian premises Integrating anthropology with methods of analysis from architecture urban studies social history and critical theory Holston presents a critique of modernism based on a powerfully innovative ethnography of the city

Optical Diagnostics for Flow Processes P. Buchhave, L. Lading, G. Wigley, 2013-11-11 The origin of optical methods for fluid flow investigations appears to be nontraceable This is no matter for surprise After all seeing provides the most direct and common way for humans to learn about their environment But at the same time some of the most sophisticated methods for doing measurements in fluids are also based on light and often laser light A very large amount of material has been published in this area over the last two decades Why then another publication Well the field is still in a state of rapid development It is characterised by the use of results and methods developed within very different areas like optical physics spectroscopy communication systems electronics and computer science mechanical engineering chemical engineering and of course fluid dynamics We are not aware of a book containing both introductory and more advanced material that covers the same material as presented here The book is the result of a compilation and expansion of material presented at a summer school on Optical Diagnostics for Flow Processes held at RiSO

National Laboratory and the Technical University of Denmark in September 1993 The aim of the course was to provide a solid background for understanding evaluating and using modern optical diagnostic methods addressing Ph D students and researchers active in areas of fluid flow research The disciplines represented by the participants ranged from atmospheric fluid dynamics to biomedicine

The Spectacle of Disintegration McKenzie Wark, 2013-03-12 Following his acclaimed history of the Situationist International up until the late sixties *The Beach Beneath the Street* McKenzie Wark returns with a companion volume which puts the late work of the Situationists in a broader and deeper context charting their contemporary relevance and their deep critique of modernity Wark builds on their work to map the historical stages of the society of the spectacle from the diffuse to the integrated to what he calls the disintegrating spectacle *The Spectacle of Disintegration* takes the reader through the critique of political aesthetics of former Situationist T J Clark the Fourierist utopia of Raoul Vaneigem Ren Vigneron's earthy situationist cinema Gianfranco Sanguinetti's pranking of the Italian ruling class Alice Becker-Ho's account of the anonymous language of the Romany Guy Debord's late films and his surprising work as a game designer At once an extraordinary counter history of radical praxis and a call to arms in the age of financial crisis and the resurgence of the streets *The Spectacle of Disintegration* recalls the hidden journeys taken in the attempt to leave the twentieth century and plots an exit from the twenty first The dustjacket unfolds to reveal a fold out poster of the collaborative graphic essay combining text selected by McKenzie Wark with composition and drawings by Kevin C Pyle
