

Octane rating and unleaded gasoline availability may vary between gasoline stations. If you plan to drive your vehicle outside the United States, check the availability of gasoline of the correct type and rating in the area you expect to visit.

Gasoline Tank Filler Location

The filler tube location is shown in the following illustration.

CAUTION — Use of an after-market fuel filler cap other than an authorized Ford/Motorcraft service part or the equivalent could result in damage to the fuel system or cause improper system operation if not properly designed/manufactured for pressure and vacuum relief. Customer warranty is void for fuel tank and/or fuel system damage resulting from use of such caps.

Gasoline Tank Filling

- Gasoline pumps which dispense unleaded gasoline are required by Federal regulations to be labeled with the words "Unleaded Gasoline." Such pumps are also equipped with specially sized nozzles to fit the gasoline filler pipe in your vehicle.

If the fuel tank in your vehicle has been overfilled, expansion of gasoline due to temperature increases may cause gasoline overflow at the filler cap when the vehicle is standing or if the cap is removed. To minimize this condition, it is recommended that the amount of gasoline put in the tank when filling be limited to the automatic pump shutoff. See page 180 for fuel tank refill capacities.
