Temple Grandin

2014 History Past Paper G12:

Preserving the Past Julia Horne, Stephen Garton, 2017-03-20 The Dawkins reforms of the late 1980s and the creation of the Unified National System roused passions at many universities across the nation over fears for the academic enterprise and Australia's system of free public university education. With much at stake the Dawkins reforms became a hot topic of discussion across university campuses and even between Vice Chancellors and state education ministers. Vice Chancellors were threatened with motions of no confidence, staff argued furiously against change and students protested against fees yet mostly to no avail. The reforms were introduced and universities became subject to new ways of funding by the Commonwealth that changed the way higher education was organised in Australia. This volume tells the story of the Dawkins reforms at Australia's oldest university, the University of Sydney, and the unlikely alliance between the University's Vice Chancellor and the New South Wales government in the scramble for more students. Between 1988 and 1996 the University grew exponentially. At the same time it strove to preserve its honoured past despite profound change. Did this desire to preserve an older tradition compromise its effort to master the future?

Petroleum Geology of NW Europe B. Levell, M. Bowman, 2018-02-15 Published by the Geological Society on behalf of PGC Ltd. 1 hardback volume in slipcase. The 8th Conference on the Petroleum Geology of NW Europe was held in September 2015 and marked the 50th anniversary of the first commercial discovery offshore in the North Sea West Sole in September 1965. Its focus was 50 Years of Learning: a Platform for Present Value and Future Success, and its objective was to provide an update on discoveries, developments, technologies and geological concepts from the region. The 39 extensively illustrated technical papers cover the full width of recent activity and are divided into the following sections: Plays and fairways; Play assessment; Recent successes and learnings from failures; Infrastructure; led exploration and development; Late life fields; re-development and the next life; Onshore exploration and development. The proceedings volume follows the format of many of the previous conferences since the first in 1974. Collectively these provide a unique documentation of the discovery and development of several NW European hydrocarbon provinces. The volume will be of interest to all geoscientists involved in exploration and development in NW Europe. It provides a fascinating overview of how creativity can continue to reveal hidden resources in an area that has been called mature for at least the last 20 of its 50 year history.
