Research on Emotion and Learning: Contributions from Latin America Camilo Hurtado-Parrado, Carlos Gantiva, Leonardo A. Ortega, Alexander Gómez-A, Lucas Cuenya, Javier Leonardo Rico, 2020-05-11 Latin America has increased its share of world scientific publications by nearly twofold during the last two decades approximately from 2 to 4% Despite this positive trend the scholarly impact of scientific research produced in the region measured in terms of citation rate remains low Two interrelated factors that contribute to this situation is that most research groups tend to work in isolation or in local sporadic collaboration and results are often published in journals that are not indexed in major citation databases e g SCOPUS or Web of Science Ultimately part of Latin American high quality research seems to remain hidden from the rest of the world Over the last decades an important number of Latin American scientists have developed fruitful research agendas on questions on learning and emotion focusing on basic and or translational research with humans and other animal models and implementing diverse methodologies Notwithstanding the important contributions of these research programs Latin American research on emotion and learning has followed the overall trend of other research fields throughout the region namely remaining partially hidden from the large scientific community of the world This Research Topic aimed to engage researchers from Latin America to share their empirical and conceptual work on learning and emotion Ultimately this effort was expected to strengthen and integrate our regional community of experts enhance global networking and establish new challenges and developments for future investigation

Mixed Messages Stefanie Mollborn, 2017 Sex is bad Unprotected sex is a problem Having a baby would be a disaster Abortion is a sin Teenagers in the United States hear conflicting messages about sex from

everyone around them How do teens understand these messages In *Mixed Messages* Stefanie Mollborn examines how social norms and social control work through in depth interviews with college students and teen mothers and fathers revealing the tough conversations teenagers just can't have with adults Delving into teenagers' complicated social worlds Mollborn argues that by creating informal social sanctions like gossip and exclusion and formal communication such as sex education families peers schools and communities strategize to gain control over teens' behaviors However while teens strategize to keep control they resist the constraints of the norms revealing the variety of outcomes that occur beyond compliance or deviance By showing that the norms existing today around teen sex are ineffective failing to regulate sexual behavior and instead punishing teens that violate them Mollborn calls for a more thoughtful and consistent dialogue between teens and adults emphasizing messages that will lead to more positive health outcomes
