creates specific historical demographic political and socio cultural drivers of change value chains that are often short and reliant on informal exchange and small scale operations distinct territorial imbalances that create significant inequalities and normative and cognitive institutions that create diverse cultural beliefs and values while influencing the roles of women and youth in food systems We welcome submission of original research articles case studies systematic reviews or meta analysis that offer new insights and perspectives on African food systems transformation This topic will bring together interdisciplinary research and practice and provide a platform for knowledge exchange collaboration and collective action for transforming African food systems so that they are equitable resilient and sustainable *Report of the Annual Meeting of the South African Association for the Advancement of Science* ,2006
