SOUTH AFRICA AA.VV., 2016-11-14 Has the new South Africa once an inspiring rainbow nation failed the expectations it had generated? Is the country now in a crisis? Two decades after the end of the apartheid regime, Africa's southernmost state faces multiple political, economic, and social challenges. A lackluster growth performance is compounded by mounting corruption and political turbulence, as well as by the frustration of many ordinary citizens who expected much more rapid social and economic improvement. Labour strikes, student protests, and anti-immigrant riots have all been on the rise. As a clear sign of increasing dissatisfaction, uncertainty, and decline, the ruling African National Congress recently ran into its worst electoral result ever, if still only at local levels. Meanwhile, Jacob Zuma's embattled presidency, marred by allegations of corruption and political cronyism, sent South Africa's international image plummeting alongside the Rand, the national currency. This volume sheds light on the current difficulties and discusses future prospects. The new South Africa is a country in dire need for change.

The Collected Documents of the Group of 77, Volume VII Mourad Ahmia, 2024-05-07 This compilation of documents collects policy statements and common positions of the developing countries on climate change issues acting through the Group of 77 as a Global South coalition of nations in the framework of the United Nations system. Climate change is one of the greatest challenges of our time, and its widespread, unprecedented impact burdens all countries, in particular the Global South. The volume features previously unreleased material and spans from the early 1990s to 2018.

How Social Movements Imagine Bobby Luthra Sinha, 2024-08-30 This book examines how micro-contextual issues inspire collective social action forms against everyday situations of crises and crimes through an interdisciplinary ethnographic and comparative research conducted among Bishnois and Indian South Africans. Exploring the role of the publics that practise and mobilise their social movement imaginations, the work delves into people's ability to move beyond their immediate contexts and politicise multiple social spaces and discursive spheres around them to project their causes. Mapping an anti-poaching movement spearheaded by the Bishnois of Western Rajasthan in India and an anti-substance abuse movement led by the historical Indian diaspora of South Africa, the author argues that such

contemporary forms of organised social action replete with alternative frames symbols and repertoires possess key requisites to be understood as the Newer Social Movements of the Global South The volume will be of great interest to scholars and researchers of social and protest movements migration and diaspora studies political science social anthropology and ethnography The Wiley Handbook of Learning Technology Nick Rushby, Dan Surry, 2016-04-25 The Wiley Handbook of Learning Technology is an authoritative and up to date survey of the fast growing field of learning technology from its foundational theories and practices to its challenges trends and future developments Offers an examination of learning technology that is equal parts theoretical and practical covering both the technology of learning and the use of technology in learning Individual chapters tackle timely and controversial subjects such as gaming and simulation security lifelong learning distance education learning across educational settings and the research agenda Designed to serve as a point of entry for learning technology novices a comprehensive reference for scholars and researchers and a practical guide for education and training practitioners Includes 29 original and comprehensively referenced essays written by leading experts in instructional and educational technology from around the world **Race for Education** Mark Hunter, 2019-01-24 An examination of families and schools in South Africa revealing how the marketisation of schooling works to uphold the privilege of whiteness

Wolhuter, 2019-12-12 The focus of this publication is on answering the central research question How can Human Rights be advanced with regard to different kinds of diversities and in different educational settings The publication pays special attention to the advancement of human rights in a variety of education related contexts in keeping with human rights as a declared national priority for both society at large and the education system One strategic priority of the Faculty of Education is research based on market requirements and needs This book strives towards meeting this expectation by directly aiming at building human rights and social justice in the South African society public schools and higher education institutions Adjudication in the education context of the constitutional values of dignity equality and freedom focusses regularly on learners The book highlights the value of education for full fledged citizenship by delineating what schooling

The State of African Cities, 2014 United Nations Publications, 2015-09-10 The African continent is currently in the midst of simultaneously unfolding and highly significant demographic economic technological environmental urban and socio political transitions Africa's economic performance is promising with booming cities supporting growing middle classes and creating sizable consumer markets Despite significant overall growth the continent continues to suffer under very rapid urban growth accompanied by massive urban poverty and many other social problems These seem to indicate that the development trajectories followed by African nations since post independence may not be able to deliver on the aspirations of broad based human development and prosperity for all This report therefore argues for a bold re imagining of prevailing models in order to steer the ongoing transitions towards greater sustainability based on a thorough review of all available options That is especially the case since the already daunting urban challenges in Africa are now being exacerbated by the new vulnerabilities and threats associated with climate and environmental change

Infrastructures for Peace in Sub-Saharan Africa Mediel Hove, Geoff Harris, 2019-06-14 Cultures of violence are characteristic of many countries in sub Saharan Africa and attempts to move towards cultures of peace have often proved difficult and ineffectual And yet the wide variations in levels of violence within and between countries show that it is not inevitable rather it is the result of choices made at individual community and

societal levels This book examines the potential of peace infrastructures as vehicles to strengthen and spread progress towards cultures of peace Peace infrastructures vary hugely in sophistication and level The examples examined in this book range from tiny structures which help resolve conflicts between individuals and within community organisations peace committees which serve local communities peace education and peace club programmes in schools mediation mechanisms to prevent election violence and to ministries of peace to coordinate government and non government efforts in peacemaking and peacebuilding The overall finding is that the development of peace infrastructures at all levels has great potential to build cultures of peace 1 It is the only book available which documents the experience and potential of nonviolence in post independence sub Saharan Africa 2 It makes a persuasive case for the development of various peace infrastructures in order to make peace sustainable 3 It explains how strategic planning can be utilised both to bring about change and to institutionalise it
