2014 November Agricultural Science Paper 1 Memo:

Global Agriculture and the American Farmer Kimberly Ann Elliott, 2017-06-27 The United States is one of the world's largest producers and exporters of a range of agricultural commodities and the largest provider of foreign assistance so U.S. policies have big effects on global food security and other global public goods linked to agriculture. On the positive side of the ledger President Obama created the Feed the Future aid initiative to promote agricultural development in poorer countries as a tool to achieve the global goals of ending hunger and extreme poverty which are mostly rural. But that generosity is undercut by U.S. support for farmers that distorts global markets and ignores negative spillovers for the rest of the world. In this book Elliott focuses on three policy areas that are particularly damaging for developing countries: traditional agricultural subsidy and trade policies that support the incomes of American farmers at the expense of farmers elsewhere; the biofuels mandate which in its current form increases market volatility while doing little if anything to mitigate climate change; and weak regulation of antibiotic use in livestock which contributes to the global spread of drug-resistant super bugs. While noting that broad reforms are needed to fix these problems, Elliott also identifies practical steps that U.S. policymakers could take in the relatively short run to improve farm policies for American taxpayers and consumers as well as for the poor and vulnerable in developing countries.

Them and Us Philippe Legrain, 2020-10-15 Winner of the Diversity Inclusion and Equality Award at the Business Book Awards 2021 Underpinned by scholarship entertaining Legrain's book fizzles with practical ideas. The Economist: The beauty of diversity is that innovation often comes about by serendipity. As Scott Page observed one day in 1904 at the World Fair in St. Louis, the ice cream vendor ran out of cups. Ernest Hami, a Syrian waffle vendor in the booth next door, rolled up some waffles to make cones, and the rest is history. Filled with data, anecdotes, and optimism, *Them and Us* is an endorsement of cultural differences at a time of acute national introspection. By every measure, from productivity to new perspectives, immigrants bring something beneficial to society. If patriotism means wanting the best for your country, we should be welcoming immigrants with open arms.

Food in America Andrew F. Smith, 2017-02-16 This three-volume work examines all facets of the modern U.S. food system, including the nation's most important food and agriculture laws, the political forces that shape modern food policy, and the food production trends that are directly impacting the lives of every American family. Americans are constantly besieged by conflicting messages about food, the environment, and health and nutrition. Are foods with genetically modified ingredients safe? Should we choose locally grown food? Is organic food better than conventional food? Are concentrated animal feed operations destroying the environment? Should food corporations target young children with their advertising and promotional campaigns? This comprehensive three-volume set addresses all of these questions and many more, probing the problems created by the industrial food system, examining conflicting opinions on these complex food controversies, and highlighting the importance of food in our lives and the decisions we make each time we eat. The coverage of each of the many controversial food issues in the set offers perspectives

from different sides to encourage readers to examine various viewpoints and make up their own minds The first volume Food and the Environment addresses timely issues such as climate change food waste pesticides and sustainable foods Volume two entitled Food and Health and Nutrition addresses subjects like antibiotics food labeling and the effects of salt and sugar on our health The third volume Food and the Economy tackles topics such as food advertising and marketing food corporations genetically modified foods globalization and megagrocery chains Each volume contains several dozen primary documents that include firsthand accounts written by promoters and advertisers journalists politicians and government officials and supporters and critics of various views related to food and beverages representing speeches advertisements articles books portions of major laws and government documents to name a few These documents provide readers additional resources from which to form informed opinions on food issues
