2014 November Physical Sciences Question Paper:

The Lived Experience of Climate Change Dina Abbott, Gordon Wilson, 2015-04-22 This book explores the idea that daily lived experiences of climate change are a crucial missing link in our knowledge that contrasts with scientific understandings of this global problem. It argues that both kinds of knowledge are limiting the sciences by their disciplines and lived experiences by the boundaries of everyday lives. Therefore each group needs to engage the other in order to enrich and expand understanding of climate change and what to do about it. Complemented by a rich collection of examples and case studies, this book proposes a novel way of generating and analysing knowledge about climate change and how it may be used. The reader is introduced to new insights where the book provides a framework that explains the variety of simultaneous co-existing and often contradictory perspectives on climate change. Reclaims everyday experiential knowledge as crucial for meeting global challenges such as climate change. Overcomes the science/citizen dichotomy and leads to new ways of examining public engagement with science. Scientists are also human beings with lived experiences that filter their scientific findings into knowledge and actions. Develops a public action theory of knowledge as a tool for exploring how decisions on climate policy and intervention are reached and enacted. While scientists/physical and social seek to explain climate change and its impacts, millions of people throughout the world experience it personally in their daily lives. The experience might be bad as during extreme weather engender hostility when governments attempt mitigation and sometimes it is benign. This book seeks to understand the complex, often contradictory knowledge dynamics that inform the climate change debate and is written clearly for a broad audience including lecturers, students, practitioners and activists; indeed anyone who wishes to gain further insight into this far-reaching issue.

Clickers in the Classroom David S. Goldstein, Peter D. Wallis, 2023-07-03 With classroom response systems or CRSs also known as Student Response Systems, Individual Response Systems or informally clickers in use in higher education for some 20 years, there is now both ample research and a wealth of examples and ideas to draw on for faculty who are contemplating their use or exploring new ways to integrate them in their teaching. The research demonstrates that integrated purposefully in courses, the use of clickers aligns with what neuroscience tells us about the formation of memory and the development of learning. In addition, they elicit contributions from otherwise reticent students and enhance collaboration even in large lecture courses, foster more honest responses to discussion prompts, increase students' engagement and satisfaction with the classroom environment and provide an instantaneous method of formative assessment. This book presents a brief history of the development of CRSs and a survey of empirical research to provide a context for current best practices and then presents seven chapters providing authentic, effective examples of the use of clickers across a wide range of academic disciplines, demonstrating how they can be effective in helping students to recognize their misconceptions and grasp fundamental concepts. Like all pedagogical interventions, classroom response systems are no panacea and the experienced contributors candidly describe avoidable pitfalls while demonstrating how

clickers can deepen student learning and how by providing instantaneous feedback they enable teachers to make adjustments on the fly to better address student understandings or misunderstandings The final chapter explores pros and cons of response systems that use mobile devices and smart phones and the book concludes with an annotated list of further resources such as books articles and videos Carbon Pricing Larry Kreiser, Mikael Skou Andersen, Birgitte Egelund Olsen, Stefan Speck, Janet E. Milne, 2015-08-28 Carbon Pricing reflects upon and further develops the ongoing and worthwhile global debate into how to design carbon pricing as well as how to utilize the financial proceeds in the best possible way for society The world has recently witnessed **Research, Boundaries, and Policy in Networked Learning** Thomas Ryberg, Christine Sinclair, Sian Bayne, Maarten de Laat, 2016-08-18 This book presents cutting edge peer reviewed research on networked learning organized by three themes policy in networked learning researching networked learning and boundaries in networked learning The policy in networked learning section explores networked learning in relation to policy networks spaces of algorithmic governance and more The boundaries in networked learning section investigates frameworks of students digital literacy practices among other important frameworks in digital learning Lastly the research in networked learning section delves into new research methods in the field Teaching and Digital Technologies Michael Henderson, Geoff Romeo, 2016-01-08 Teaching and Digital Technologies Big Issues and Critical Questions helps both pre service and in service teachers to critically question and evaluate the reasons for using digital technology in the classroom Unlike other resources that show how to use specific technologies and quickly become outdated this text empowers the reader to understand why they should or should not use digital technologies when it is appropriate or not and the implications arising from these decisions The text directly engages with policy the Australian Curriculum pedagogy learning and wider issues of equity access generational stereotypes and professional learning The contributors to the book are notable figures from across a broad range of Australian universities giving the text a unique relevance to Australian education while retaining its universal appeal Teaching and Digital Technologies is an essential contemporary resource for early childhood primary and secondary pre service and in service teachers in both local and international education environments

Psychological and Pedagogical Considerations in Digital Textbook Use and Development Railean, Elena, 2015-04-30 This book offers balanced coverage of the technological solutions that contribute to the design of digital textbooks and contribute to achieving learning objectives offering an emphasis on assessment mechanisms and learning theory **Spectral Line Shapes in Astrophysics and Related Topics** Milan S. Dimitrijević, Luka Č. Popović, 2020-02-18 Spectral lines widths and shapes are powerful tools for emitting absorbing gas diagnostics in different astrophysical objects from the solar system to the most distant objects in the universe quasars On the other hand experimental and theoretical investigations of laboratory plasma have been applied in spectroscopic astrophysical research especially in research on atomic data needed for line shape calculations Data on spectral lines and their profiles are also important for diagnostics analysis and the modelling of fusion

plasma laser produced plasma laser design and development and various plasmas in industry and technology like light sources based on plasmas or the welding and piercing of metals by laser produced plasma The papers from this book can be divided into four groups 1 stark broadening data for astrophysical and laboratory plasma investigations 2 applications of spectral lines for astrophysical and laboratory plasma research 3 spectral line phenomena in extragalactic objects and 4 laboratory astrophysics results for spectra investigation The reviews and research papers representing new research on the topics presented in this book are of interest for specialists and PhD students We hope that the present book will be useful and interesting for scientists interested in the investigation of spectral line shapes and will contribute to the education of young researchers and PhD students

The Carbon Crunch Dieter Helm, 2015-01-01 In a new edition of his hard hitting book on climate change economist Dieter Helm looks at how and why we have failed to tackle the issue of global warming and argues for a new pragmatic rethinking of energy policy An optimistically levelheaded book about actually dealing with global warming Kirkus Reviews starred review Dieter Helm has turned his agile mind to one of the great problems of our age why the world s efforts to curb the carbon dioxide emissions behind global warming have gone so wrong and how it can do better Pilita Clark Financial Times
