Teaching and Learning Secondary School Mathematics Ann Kajander, Jennifer Holm, Egan J Chernoff, 2018-10-24

This volume brings together recent research and commentary in secondary school mathematics from a breadth of contemporary Canadian and International researchers and educators. It is both representative of mathematics education generally as well as unique to the particular geography and culture of Canada. The chapters address topics of broad applicability such as technology in learning mathematics, recent interest in social justice contexts in the learning of mathematics as well as Indigenous education. The voices of classroom practitioners, the group ultimately responsible for implementing this new vision of mathematics teaching and learning, are not forgotten. Each section includes a chapter written by a classroom teacher, making this volume unique in its approach. We have much to learn from one another, and this volume takes the stance that the development of a united vision supported by both research and professional dialog provides the first step.

Being Forgotten on the Internet Alexander Novotny, 2016-03-16. The boundless long term retention of information about people's lives on the world wide web jeopardizes their reputation and deprives them of a fresh start. Mr Costeja Gonz'lez' reputation for example was damaged by twelve year old newspaper articles on Google attesting him a poor creditworthiness. ECJ C 131/12. His case triggered a public discussion about creating a forgetting Internet and counteracting the age of everlasting personal data retention. This book argues that the world wide web endangers people's reputation by presenting them and their online profiles short of temporal context. Drawing on Heidegger's and Ricoeur's philosophy of time, Walzer's spheres of justice, Solove's visionary pragmatism for privacy and Nissenbaum's theory of privacy as contextual integrity, the book proposes safeguarding the temporal contextual integrity of personal information online. The author suggests designing web user interfaces for making the passage of time within people's online representations prominent. With time sensitive interfaces, employers start ignoring job seekers' obsolete reputation in online labor markets. Technology requirements for a forgetting Internet are discussed.

Drawing together authors from all of these jurisdictions, this book analyses and evaluates these initiatives and makes predictions as to their likely success and possible flaws.
