NWEA FAQ Northwest Evaluation Association,2015 Northwest Evaluation Association NWEA conducts norming studies every several years to provide the best and most up to date information we can about student achievement and growth to better support educational decision making It is an important part of our commitment to our partners The most recent NWEA norms were released in July 2015 Just as we expect student performance to change with time norms of student performance will change correspondingly For 2015 several factors may have influenced how the US school age population performed on Measures of Academic Progress MAP assessments of language usage mathematics and reading over the 2011 12 2012 13 and 2013 14 school years Prominent among these possible factors are the introduction of Common Core instruction and Common Core versions of MAP But as with all empirical studies changes in scope and data necessitated changes in statistical design and analyses The methodological improvements introduced in the 2015 norms have resulted in a set of norms that are more representative of the US school age population than previous NWEA norms Methodological changes involved differences in the way post stratification weights were developed and the way growth was modeled Details of these changes are addressed more thoroughly in the 2015 Norms Study As a result of the improved methodology partners can expect some differences from previous norms as explained below

Common Core State Standards of Mathematics and Student Achievement Eugene Anthony Benner,2015 The purpose of this action research study was to determine if students in my 8th Grade Mathematics and 9th Grade Algebra I classes would have a noticeable increase in their individual mathematics achievement scores on the NWEA MAP tests after being taught material aligned to the new North Dakota Mathematics Content Standards based on Common Core State Standards I also wanted to know how students felt about the different teaching styles used in the classroom when they had to do activities and assignments aligned to the new standards Each student kept a journal to keep track of their thoughts and feelings on how things were going in the classroom Students were exposed to new activities and teaching strategies to help them better understand the material being taught The activities and teaching strategies also helped students make connections between the real world and the classroom content being taught These new activities or rich tasks were to help students better understand the material being taught The students total change in mathematics achievement was measured as well as their percentage of change and the class

average change of mathematics achievement scores The NWEA data was collected from the Fall 2012 Spring 2013 Fall 2013 and Spring 2014 NWEA MAP tests as these tests were aligned to the Common Core There were some improvements in student growth but there were some apprehensiveness from the students towards the different teaching and testing strategies
