Design & Analysis of Clinical Trials for Economic Evaluation &

Reimbursement Iftekhar Khan, 2015-11-11 Economic evaluation has become an essential component of clinical trial design to show that new treatments and technologies offer value to payers in various healthcare systems. Although many books exist that address the theoretical or practical aspects of cost effectiveness analysis, this book differentiates itself from the competition by detailing Behavioral Science & Policy: Volume 2, Issue 1. Craig Fox, Sim B. Sitkin, 2016-11-22 The success of nearly all public and private sector policies hinges on the behavior of individuals, groups, and organizations. Today such behaviors are better understood than ever thanks to a growing body of practical behavioral science research. However, policymakers often are unaware of behavioral science findings that may help them craft and execute more effective and efficient policies. The pages of this new journal will become a meeting ground, a place where scientists and non-scientists can encounter clearly described behavioral research that can be put into action. By design, the scope of BSP is broad, with topics spanning health care, financial decisionmaking, energy, and the environment, education, and culture, justice, and ethics, and workplace practices. Contributions will be made by researchers with expertise in psychology, sociology, law, behavioral economics, organization science, decision science, and marketing. The journal is a key offering of the Behavioral Science Policy Association in partnership with the Brookings Institution. The mission of BSPA is to foster dialog between social scientists, policymakers, and other practitioners in order to promote the application of rigorous empirical behavioral science in ways that serve the public interest. BSPA does not advance a particular agenda or political perspective. The first issue's contents follow: Behavioral Science Policy vol 2 no 1 Table of Contents Editors Note Spotlight Pre Kindergarten Interventions American Policy on Early Childhood Education Development Many Programs Great Hopes Modest Prospects Ron Haskins Evidence for the Benefits of State Prekindergarten Programs Myth Misrepresentation Dale C Farran Mark W Lipsey Reforming Head Start for the 21st Century A Policy Prescription Sara Mead Ashley LiBetti Mitchel Home Visiting Programs Four Evidence Based Lessons for Policymakers Cynthia Osborne Launching Preschool 2.0 A Road Map to High Quality Public Programs at Scale Christina Weiland A 10 Year Strategy of Increased Coordination Comprehensive Investments in Early Child Development Ajay Chaudry Jane Waldfogel Reimagining Accountability in K-12 Education Brian P Gill Jennifer S Lerner Paul Meosky Featured Topic Healthy Through Habit Interventions for Initiating Maintaining Health Behavioral Change Wendy Wood David Neal Making the Truth Stick the Myths Fade Lessons from Cognitive Psychology Norbert Schwarz Eryn Newman William Leach Editorial Policy The role of social identity in shaping economic choices: Evidence from women's self-help groups in India Alvi, Muzna Fatima, Raghunathan, Kalyani, Sehgal, Mrignyani, 2019-12-24 Group based interventions are fast gaining traction in developing countries, often bolstering existing government service delivery systems. Such groups provide development programs with a means of extending their reach to households and individuals that might otherwise not seek public goods and services. However, the very reliance on the notion of community in these programs can constrain participation to those with a shared identity. In India, shared caste identity remains a central and often controversial element.

in many community based programs We explore the salience of caste identity with a field experiment conducted among women s self help groups in an eastern state of India The experiment focused on the provision of information on nutrition diet and kitchen gardens Specifically we test the interplay between a the provision of information to self help groups and b the caste identity of the information provider relative to the group s caste identity to assess what matters more the message or the messenger We randomize two treatments an information treatment and a homophily treatment and measure the effect of these treatments on two outcomes group members willingness to contribute to a group owned club good a collectively managed kitchen garden and individual members retention of the information they received We find that 1 information is very important 2 homophily or shared caste identity with the information provider is not that important but 3 higher caste information providers elicit greater willingness to contribute These findings have several implications for the design of public programs that rely on community based organizations and agents as implementing partners and may thus be susceptible to identity issues such as the exclusion of lower castes from certain occupations public spaces or public goods
