Resilience and Food Security in a Food Systems Context Christophe Béné, Stephen Devereux, 2023-03-25

This open access book compiles a series of chapters written by internationally recognized experts known for their in-depth but critical views on questions of resilience and food security. The book assesses rigorously and critically the contribution of the concept of resilience in advancing our understanding and ability to design and implement development interventions in relation to food security and humanitarian crises. For this, the book departs from the narrow beaten tracks of agriculture and trade which have influenced the mainstream debate on food security for nearly 60 years and adopts instead a wider, more holistic perspective framed around food systems. The foundation for this new approach is the recognition that in the current post-globalization era, the food and nutritional security of the world's population no longer depends just on the performance of agriculture and policies on trade, but rather on the capacity of the entire food system to produce, process, transport, and distribute safe, affordable, and nutritious food for all in ways that remain environmentally sustainable. In that context, adopting a food system perspective

provides a more appropriate frame as it incites to broaden the conventional thinking and to acknowledge the systemic nature of the different processes and actors involved This book is written for a large audience from academics to policymakers students to practitioners This is an open access book

Food Policy and Practice in Early Childhood Education and Care Francesca Vaghi, 2023-11-24 This book is about food and feeding in early childhood education and care offering an exploration of the intersection of children s food education family intervention and public health policies The notion of good food for children is often communicated as a matter of common sense by policymakers and public health authorities yet the social material and practical aspects of feeding children are far from straightforward Drawing on a detailed ethnographic study conducted in a London nursery and children s centre this book provides a close examination of the practices of childcare practitioners children and parents asking how the universalism of policy and bureaucracy fits with the particularism of feeding and eating in the early years Looking at the unintended consequences that emerged in the field such as contradictory public health messaging and arbitrary policy interventions the book reveals the harmful assumptions about disadvantaged groups that are perpetuated in policy discourse and challenges the constructs of individual choice and responsibility as main determinants of health Children s food practices at the nursery are examined to explore the notion that whilst for adults it is what children eat that often matters most to children it is how they eat that is more important This book contributes to a growing body of literature evidencing how children s food is a contested domain in which power relations are continuously negotiated This raises questions not only on how children can be included in policy beyond a tokenistic involvement but also on what children s well being might mean beyond the biomedical sphere The book will particularly appeal to students and scholars in food and health food policy childhood studies and medical anthropology Policymakers and non governmental bodies working in the domains of children s food and early years policies will also find this book of interest

Activism and the Detention of Migrants Tom Kemp, 2023-12-05 This book is an empirically grounded critical engagement with the politics of immigration detention and deportation Focusing on the constitutive tensions and political generativity within the activist practices of the anti detention movement this book examines the distinction between representational and post representational political sensibilities Representational politics centres on representing the interests of disenfranchised people to the state and public and operates primarily within the regime of immigration law Post representational politics focuses on working collaboratively with those in detention to resist and challenge the deportation system Since representational politics is the predominant political imaginary of migrant rights campaigning the book focuses on illustrating and evaluating the role of post representational politics The book argues that the concept of post representational politics is important for understanding and participating in radical opposition to state racism This argument rests on the expanded possibilities it motivates of engaging with and resisting institutions that are poised to co opt resistance the attention it fosters to the situated power dynamics of political activities that collaborate with imprisoned people and its

sensitivity to the politically and conceptually generative capacities of everyday embodied practices of resistance To make this argument this book employs innovative methodology to illuminate and engage with the practice based thinking of activist movements about the concepts of solidarity hospitality witnessing and accountability This book will be of interest to scholars and activists with interests in socio legal studies of immigration and refugee law as well as others in social movement studies critical legal studies border criminology and critical theory
