

This regulation has high difficulty because of high variety from the fixed assets they owned. This regulation also stated that every fixed asset class has certain economic useful time. Estimate economic time of fixed asset is prohibited. In financial standards, taxpayer can estimate fixed asset economic time. The different age of the fixed assets under both of regulation is very influential in the fixed asset depreciation calculation.

Some of differences come when IAI (Indonesian Accounting Institute) decide to adopted IFRS for Indonesian Financial Accounting Standard (Ratumananingsih et al, 2013). First difference is about fixed asset evaluation. Based on the Financial Accounting Standards (FASB) No. 16 (Revised in 2011), paragraph 24, says that there is prohibition to measure fixed assets evaluation. Opposite from that regulation, based on Finance Minister Regulation No. 79/PMK.01/2008, a fixed asset evaluation conducted should have a permission of the Minister. This regulation also stated that fixed asset evaluation can only be done once in 5 years. The two condition must be fulfilled in order revaluated fixed asset. This difference makes tax payer must re-evaluated fixed asset value every time they do fixed asset evaluation, but they can't fulfill required condition in Finance Minister Regulation No. 79/PMK.01/2008. Other difference which caused by IFRS adoption is about fixed asset impairment. IFRS said that fixed asset impairment can be done when the organization estimates that there is reduction of fixed asset value, or if there is potentially asset reduction. Fixed asset impairment under IFRS is possibly done at any time. Opposite of IFRS, taxation regulation prohibited impairment. In taxation value of existing fixed assets is historical, not estimation value, so there is impossible for fixed asset impairment.

2.2 Technology Acceptance Model (TAM)

In general, research on the behavioral aspects of technology absorption derived from the some psychology theory. In this study, the main research base used is the Technology Acceptance Model (TAM) developed by Davis (Davis, 1999) from the Theory of Reasoned Action. TAM is a theory that is used to predict the acceptability (acceptability) or adoption of a tool or technology and identify possible modifications needed for the technology to be accepted by users. TAM explained that the acceptance of a technology is increased based on two main things that perceived benefits (perceived usefulness) and perceived ease of use. Perceived ease of use also contributed instrumental in improving the performance of a person. The easier the use of an information system means less and less effort means a person must do in order to improve its performance by using the information system. By using the accounting software program taxation fixed assets that have to accommodate the needs of both IFRS standards compliance tax regulation, so users will be able to reduce their effort required to improve performance.

2.3 Reinforcement Theory

Selection of a method or system that is used by the taxpayer will always be influenced by motivation businesses in conducting their business activities. Motivation is generally arise when the officer knows the needs and shortcomings of activities, then look for ways to satisfy his needs. Achievement of these activities behavioral activities directed at the expected goals. It will be more influenced in the performance. Then he would measure his needs after seeing the results or impact of the performance obtained is done. The extent to which positive or negative impact that he got the action he did to fulfill the needs and shortcomings faced.

One of the theories of motivation is the theory of reinforcement. This reinforcement theory states that behavior is influenced consequences (Gibson, 2003). Based on the theory of strengthening managerial perspective will be very influential when he realized the benefits or positive consequences of the use of accounting software tax fixed assets compared to using manual calculation. Similarly, a taxpayer's motivation for choosing the method of tax reporting preparation will be influenced by how large the benefits of the system are presented. The higher the benefits of the use of accounting information it will motivate taxpayers to use a particular system is the most profitable for him.

2.4 Hypotheses Development

Reinforcement Theory states that behavior is influenced consequences (Gibson, 2003). In the perspective of strengthening managerial decision making theory will be very influential when he realized the benefits or positive consequences. If the existing systems are considered able to improve their performance then they will tend to use the system. Therefore, the perception of the usefulness of the system for users becomes important. Both groups of potential users have different characteristics. Consultants handle fixed assets of more than one companies, perhaps even reach a dozen companies. Therefore consulting group is required in terms of performance compared to the taxpayer. High demands will motivate them to look for ways to make its work more efficiently. The new system becomes more useful for consultants who have to deal with more assets. The first hypothesis is formulated as follows:
H1: There are differences in the Perceived Usefulness (PU) are perceived by the taxpayer and Consultant.

Acceptance of the new system was developed greatly influenced by how easily the system can be used. Both groups of potential users of this new software has different levels of experience in calculating fixed assets. Consultant

2014 November Economis Pmemo:

Richard M. Nixon and European Integration Joseph M. Siracusa, Hang Thi Thuy Nguyen, 2018-04-13 This book re-examines the Nixon administration's attitude and approach to the European integration project. The formulation of US policy towards European integration in the Nixon presidential years 1969-1974 was conditioned by the perceived relative decline of the United States. Western European emergence and competition, the feared Communist expansionism, and US national interests. Against that backdrop, the Nixon administration saw the need to re-evaluate its policy on Western Europe and the integration process on this continent. Underpinning this study is the extensive use of newly released archival materials from the Nixon Presidential Library and Museum, the Library of Congress, and the State Department. Furthermore, the work is based on the public papers in the American Presidency Project and the materials on the topic of European integration and unification in the Archive of European Integration. Finally, the study has extensively used newspaper archives as well as the declassified online documents, memoirs, and diaries of former US officials. Mining these sources made it possible to shed new light on the complexity and dynamism of the Nixon administration's policy towards European integration. *Accountability in the Economic and Monetary Union* Menelaos Markakis, 2020 The aim of this series is to publish important and original research on EU law. The focus is on scholarly monographs with a particular emphasis on those which are interdisciplinary in nature. Edited collections of essays will also be included where they are appropriate. The series is wide in scope and aims to cover studies of particular areas of substantive and of institutional law, historical works, theoretical studies, and analyses of current debates as well as questions of perennial interest such as the relationship between national and EU law and the novel forms of governance emerging in and beyond Europe. The fact that many of the works are interdisciplinary will make the series of interest to all those concerned with the governance and operation of the EU. Book jacket **East Asia and Pacific Economic Update April 2014** World Bank World Bank, 2014-05-13 Developing countries in the East Asia Pacific region will see stable economic growth this year, bolstered by a recovery in high income economies and the market's modest response so far to the Federal Reserve's tapering of its quantitative easing, according to the East Asia Pacific Economic Update. Developing East Asia will grow by 7.1 percent this year, largely unchanged from 2013, the report says. As a result, East Asia remains the fastest growing region in the world despite a slowdown from the average growth rate of 8.0 percent from 2009 to 2013. In China, growth will ease slightly to 7.6 percent this year from 7.7 percent in 2013. Excluding China, the developing countries in the region will grow by 5.0 percent, slightly down from 5.2 percent last year. Dynamic Shipping and Port Development in the Globalized Economy Paul Yae-Woo Lee, Kevin Cullinane, 2016-04-29 This two-volume book presents an in-depth analysis of many of the most important issues facing today's shipping and port sectors. Volume 1 of *Dynamic Shipping and Port Development in the Globalized Economy* focuses on the application of theory to practice in Maritime Logistics. Europe's and Ireland's response to the economic crisis has been engineered specifically to shift the burden of paying for the crisis onto ordinary citizens while investors, financiers, bankers, and the privileged are protected. The authors expose the class-based nature of Ireland's crisis resolution. **Richard Posner** William Domnarski, 2016. The first biography of Judge Richard Posner, arguably the most prolific jurist and brilliant legal intellectual of our time. **Spirit of the Silk Road** Yongxiu Bai, Songji Wang, 2021-09-29. This book is a systematic analysis of the trade, interconnectivity, logistics, urbanization, and economic development among countries along the Silk Road. The prospects for cooperation amongst countries on the Silk Road are clarified in a book which will interest scholars of geopolitics, economic growth, and of China's Belt and Road Initiative. *Report to Congress of the U.S.-China Economic and Security Review Commission* U.S.-China Economic and Security Review Commission, 2015. The Political Economy of WTO Implementation and China's Approach to Litigation in the WTO Yen Kong Ngangjoh-Hodu, Zhang Qi, 2016-01-29. Why and how do states obey international law? This engaging book tackles this very question head-on via its examination of the conflicting and conciliating processes of the Chinese approach to litigation and the Western approach to legal orientation in the field of the WTO dispute settlement mechanism. The authors examine the normative framework of WTO rule implementation in a globalised international economic order. They further explore the notion of the rule of law in China's Confucian system and how it interacts with a rule-based world trading system. Topics discussed include theorising the WTO implementation regime, the Chinese approach to law, China and the WTO dispute settlement system, and Chinese Confucianism and compliance. With its focus on international economic law and political science, this book will be accessible to students, policy makers, practitioners, and academics looking to understand China and the rule of law in a global context. *Rationality and Legality of Non-market Economy Treatment in Antidumping Law* Shao Long, 2024-01-03. This book serves as a comprehensive study of and provides rich insight into non-market economy treatment, including its past, present, and estimated future practices and implications. It explores the introduction of the market and non-market economy dichotomy into international trade law. It traces the origin and development of non-market economy treatment against changing international economic and political background. The book examines this treatment in light of the rationale underlying anti-dumping, reflecting its alleged significance of ensuring fair trade. It, in particular, investigates the varied non-market economy treatment practices, responding concerns of China's rising as a large state-led economy, analyzing the deviation of NME treatment into an all-in trade tool. The book argues against preconceived bias and unilateral protectionism. It highlights the universal existence of government involvement in the market and proposes objective assessment of its impact on fair trade. Final proposition of the book is depoliticizing trade reforming comprehensively international trade rules to carefully calibrate different values, including promoting fairness and enhancing global social welfare. It envisages a multi-dimension overhaul of international trade rules to rebalance trade interests rather than roughly labeling an economy to confer different treatment, the practices of which lead to separation and chaos. The book

is of particular relevance and interest to economies in transition and among policy makers academicians and legal practitioners engaged in trade remedies and trade rules reconstruction
