The Oxford Handbook of Administrative Justice Marc Hertogh, Richard Kirkham, Robert Thomas, Joe Tomlinson, 2022 The core animating feature of administrative justice scholarship is the desire to understand how justice is achieved through the delivery of public services and the actions inactions and decision making of administrative bodies The study of administrative justice also encompasses the redress systems by which people can challenge administrative bodies to seek the correction of injustices For a long time now scholars have been interested in administrative justice but without necessarily framing their work as such Rather than existing under the rubric of administrative justice much of the research undertaken has existed

within sub categories of disciplines such as law sociology public policy politics and public administration Consequently although aspects of the topic have attracted rich contributions across such disciplines administrative justice has rarely been studied or taught in a manner that integrates these areas of research more systematically This Handbook signals a major change of approach Drawing together a group of world leading scholars of administrative justice from a range of disciplines The Oxford Handbook of Administrative Justice shows how administrative justice is a vibrant complex and contested field that is best understood as an area of inquiry in its own right rather than through traditional disciplinary silos
