*Bridging the Gap Between Policy and Science in Assessing the Health Status of Marine Ecosystems, 2nd Edition* Angel Borja,Michael Elliott,María C. Uyarra,Jacob Carstensen,Marianna Mea,2017-03-22 Marine management requires approaches which bring together the best research from the natural and social sciences It requires stakeholders to be well informed by science and to work across administrative and geographical boundaries a feature especially important in the inter connected marine environment Marine management must ensure that the natural structure and functioning of ecosystems is maintained to provide ecosystem services Once those marine ecosystem services have been created they deliver societal goods as long as society inputs its skills time money and energy to gather those benefits However if societal goods and benefits are to be limitless society requires appropriate administrative legal and management mechanisms to ensure that the use of such benefits do not impact on environmental quality but instead support its sustainable use

*Ecological Law in Practice* Geoffrey Garver,2024-10-21 This book presents a series of ecological law case studies designed to illustrate in concrete real world ways how ecological law would transform law in a range of diverse contexts Ecological law is an emerging and currently

mostly theoretical discipline grounded in the need to shift away from anthropocentric legal systems which aim to promote economic growth using strong protections of private property regimes and state sovereignty to ecological approaches which emphasize ecocentrism the primacy of ecological limits and intragenerational intergenerational and interspecies fairness and justice The ecological law case studies presented in this book apply the theoretical principles and concepts of ecological law to diverse real world situations or activities in several countries and contexts Taking up a range of examples from Brazil Canada Germany Mexico Nigeria the United States and internationally the book demonstrates the concrete relevance of ecological law to contemporary sustainability challenges as it reveals pathways for overcoming real world challenges in the implementation and public acceptance of ecological law This book will appeal to researchers scholars and policy makers working in the area of environmental law and governance as well as others with relevant interests in sociolegal studies human geography political science and environmental studies

Preventing HIV Among Young People in Southern and Eastern Africa Kaymarlin Govender, Nana K Poku, 2020-12-30 This book provides an overview of the current epidemiology of the HIV epidemic among young people in Eastern and Southern Africa ESA and examines the efforts to confront and reduce the high level of new HIV infections amongst young people Taking a multi dimensional approach to prevention the contributors discuss the many challenges facing these efforts in view of the slow progress in curbing the incidence of HIV amongst young people focusing particularly on the structural and social drivers of HIV Through an examination of these issues chapters in this book provide valuable insights on how to mitigate HIV risk among young people and what can be regarded as the catalysts to mounting credible policy and programmatic responses required to achieve epidemic control in the region The contributors draw on examples from a range of primary and secondary data sources to illustrate promising practices and challenges in HIV prevention demonstrating links between conceptual approaches to prevention and lessons learnt from implementation projects in the region Bringing together social scientists and public health experts who are actively engaged in finding effective solutions the book discusses which interventions works why they work and the limitations and gaps in our knowledge to curb the

pandemic amongst young people As such it is an important read for researchers focusing on HIV AIDS and public health The Open Access version of this book available at <https://www.taylorfrancis.com/books/e/10.4324/9780429462818> has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license

**Research and Professional Practice in Specialised Translation** Federica Scarpa, 2020-09-18 Specialised translation has received very little attention from academic researchers but in fact accounts for the bulk of professional translation on a global scale and is taught in a growing number of university level translation programmes This book aims to provide three things Firstly it offers a description of what makes the approach to specialised translation distinctive from wider ranging approaches to Translation Studies adopted by translation scholars and applied linguists Secondly unlike the traditional approach to specialised translation this book explores a perspective on specialised translation that is much less focused on terminology and more on the function and reception of specialised translated texts Finally the author outlines a professionally oriented hands on approach to the teaching of specialised translation resulting from many years of teaching it to MA students The book will be of interest to Translation Studies students and scholars as well as professional translators who are interested in the theory on which their activity is based

*Marine Ecosystem Assessment for the Southern Ocean: Meeting the Challenge for Conserving Earth Ecosystems in the Long Term* Monica M. C. Muelbert, 2024-12-24 National and international agencies need assessments of change in ecosystems and their drivers in order to sustain natural systems to maintain the delivery of services and to meet the challenge for conserving Earth ecosystems in the long term In marine systems change may arise directly from human activities e.g. fisheries indirectly from local or global activities cascading effects through food webs from fisheries or changing environments from climate change and or ocean acidification or from naturally varying processes A particular challenge for managers is to identify how dangerous future climate change will be for ecosystems and their services and whether mitigation or adaptation may be needed in advance in order to achieve the conservation requirements For regions of international attention particularly those that have the attention of many management or policy oriented bodies a standardized process is needed to harmonize the scientific information on the status and trends in ecosystems used by the different bodies That process also needs to ensure the information is available in a timely manner For example assessments of change in habitats species and or food webs in the Southern Ocean are currently compiled separately for at least ten different international organizations or processes A Marine Ecosystem Assessment for the Southern Ocean MEASO aims to harmonize that information for policy makers This assessment began with an international conference in April 2018 <http://www.measo2018.aq> where it was agreed to undertake the first MEASO over 2018-2019 with the view to provide the outcomes to relevant bodies such as the Scientific Committee for the Conservation of Antarctic Marine Living Resources soon after

Stockin,2022-09-23 *Winter's Basic Clinical Pharmacokinetics* Beringer, Paul,2023-09-19 Popular among students and clinicians for its easy to read case study format *Winter s Basic Clinical Pharmacokinetics* 7th Edition clarifies complex concepts to help you confidently apply pharmacokinetics and therapeutic drug monitoring to patient care This straightforward text is divided into two parts reviewing basic pharmacokinetic principles in Part I and illustrating the clinical application of these principles to the most commonly encountered problems in Part II The significantly updated and expanded 7th Edition adds essential coverage of the use of pharmacokinetics in managing obesity pregnancy as well as anticoagulation [Why Are We Waiting?](#) Nicholas Stern,2016-07-29 An urgent case for climate change action that forcefully sets out in economic ethical and political terms the dangers of delay and the benefits of action The risks of climate change are potentially immense The benefits of taking action are also clear we can see that economic development reduced emissions and creative adaptation go hand in hand A committed and strong low carbon transition could trigger a new wave of economic and technological transformation and

investment a new era of global and sustainable prosperity Why then are we waiting In this book Nicholas Stern explains why notwithstanding the great attractions of a new path it has been so difficult to tackle climate change effectively He makes a compelling case for climate action now and sets out the forms that action should take Stern argues that the risks and costs of climate change are worse than estimated in the landmark Stern Review in 2006 and far worse than implied by standard economic models He reminds us that we have a choice We can rely on past technologies methods and institutions or we can embrace change innovation and international collaboration The first might bring us some short term growth but would lead eventually to chaos conflict and destruction The second could bring about better lives for all and growth that is sustainable over the long term and help win the battle against worldwide poverty The science warns of the dangers of neglect the economics and technology show what we can do and the great benefits that will follow an examination of the ethics points strongly to a moral imperative for action Why are we waiting
