Transcriptome Profiling Mohammad Ajmal Ali, Joongku Lee, 2022-10-07 Transcriptome Profiling Progress and Prospects assists readers in assessing and interpreting a large number of genes up to and including an entire genome It provides key insights into the latest tools and techniques used in transcriptomics and its relevant topics which can reveal a global snapshot of the complete RNA component of a cell at a given time This snapshot in turn enables the distinction between different cell types different disease states and different time points during development Transcriptome analysis has been a key area of biological inquiry for decades The next generation sequencing technologies have revolutionized transcriptomics by providing opportunities for

multidimensional examinations of cellular transcriptomes in which high throughput expression data are obtained at a single base resolution Transcriptome analysis has evolved from the detection of single RNA molecules to large scale gene expression profiling and genome annotation initiatives Written by a team of global experts key topics in Transcriptome Profiling include transcriptome characterization expression analysis of transcripts transcriptome and gene regulation transcriptome profiling and human health medicinal plants transcriptomics transcriptomics and genetic engineering transcriptomics in agriculture and phylotranscriptomics Presents recent development in the tools and techniques in transcriptomic characterization Integrates expression analysis of transcripts and gene regulation Includes the application of transcriptomics in human health genetic engineering and agriculture *Advances in Bioprocess Technology* Pogaku Ravindra, 2015-08-13 This book provides an extensive overview of the latest research in environmentally benign integrated bioprocess technology The cutting edge bioprocess technologies highlighted in the book include bioenergy from lignocellulose materials biomass gasification ethanol butanol biodiesel from agro waste enzymatic bioprocess technology food fermentation with starter cultures and intellectual property rights for bioprocesses This book further addresses niche technologies in bioprocesses that broadens readers understanding of downstream processing for bio products and membrane technology for bioprocesses The latest developments in biomass and bioenergy technology are reviewed exhaustively including IPR rights nanotechnology for bioenergy products biomass gasification and biomass combustion This is an ideal book for scientists engineers students as well as members of industry and policy makers This book also Addresses cutting edge technologies in bioprocesses Broadens readers understanding of metabolic engineering downstream processing for bioproducts and membrane technology for bioprocesses Reviews exhaustively the latest developments in biomass and bioenergy technology including nanotechnology for bioenergy products biomass gasification biomass combustion and more

Fish behaviour and welfare Pablo Almazan Rueda, Rosario Martínez-Yáñez ,Ana C. Puella Cruz, 2024-09-19 Fish welfare is currently one of the most important concerns in aquaculture and knowledge on how to improve fish welfare should be practical and implementable for all aquaculture farms The objective of this Research Topic is to extend the current knowledge on fish welfare and to identify more comprehensive and practical indicators of the existing standard for fish welfare that are easily more comprehensive and practical indicators in order to make it easy to implement on fish farms A secondary objective is to identify which welfare issues are most relevant It is important to mention that good fish welfare cannot simply be extrapolated from terrestrial animals It has to take into consideration that different species of fish must also be taken into consideration Whether these are species of commercial interest or not they have different behaviour and respond differently to stress and consequently require a species specific approach to improving their welfare Intensive fish production systems have important negative consequences for the animals including impaired health and erratic behaviour For many industries their main goal is to achieve higher production whilst majority of the time welfare is not take it into

consideration Better conditions for intensively produced farm animals including fish should result in improved efficiency and performance and higher quality product for consumers We welcome papers demonstrating such effects This research topic is related to the welfare of farmed fish Fish welfare is related to how we treat our fish the type of feed how often we feed them the stocking density that it is used the environment where they are growing how we grow them from fertilized egg to fish ready to sell for public consumption This Research Topic should address fish welfare during the whole growth period and may also include papers on the attitudes and perceptions of stakeholders including fish farmers and public about fish welfare

Selenium in poultry nutrition and health Peter F. Surai, 2023-08-07 Selenium Se is an essential dietary trace element participating in the regulation of various physiological functions in humans farm animals and poultry through its incorporation into a range of selenoproteins Low Se content in main feed ingredients is a common problem worldwide and dietary Se supplementation is a current practise in poultry and farm animal nutrition Recent research clearly proved that sodium selenite used for the last 40 years as a feed supplement is not an optimal form of Se However use of organic selenium in animal poultry diets can help meeting Se requirement and maintain high immunocompetence productive and reproductive performance The goal of this book is to provide up to date information about the roles of Se in poultry nutrition and health A special emphasis is given to the role of selenium as an essential part of the integrated antioxidant system Se in feed and organic Se are characterised in detail with emphasis to selenomethionine as a storage form of Se in the body Also specific Se deficiency related diseases in poultry are described and the importance of Se in growth development immunity and reproduction is demonstrated A link between poultry industry and human health via production of Se eggs and Se enriched meat is shown This book will be of practical importance to poultry producers to nutritionists and vets as well as for avian animal scientists students of agricultural colleges and universities It will also be of interest for researchers in areas related to ecology environmental sciences evolutionary biology etc
