Christianity By looking at what English men and women thought about sight hearing smell taste and touch the stereotype that Protestantism was not sensual and that Catholicism was overly sensualised is wholly undermined Through this examination of how worship was transformed in its textual and liturgical forms the book illustrates how English religion sought to reflect changing ideas surrounding the senses and their place in religious life Worship had to be sensible and following how reformers and their opponents built liturgy around experience of the sacred through the physical allows us to tease out the tensions and pressures which shaped religious reform

Sensory Science Applications for Food Production Mehra, Rahul, Pandey, Arun Kumar, Guiné, Raquel P.F., 2024-07-17 Despite the critical role of sensory science in ensuring food quality and safety there needs to be more comprehensive educational resources that cover the breadth and depth of this field Current literature often focuses on isolated aspects leaving scholars and practitioners needing a unified reference for understanding the complex interplay of sensory organs evaluation techniques and technological advancements This gap hinders the development of skilled sensory panelists and restricts innovation in food product

development and quality control Sensory Science Applications for Food Production bridges this gap by offering a comprehensive and cohesive overview of sensory science Through its meticulously crafted chapters the book thoroughly explores sensory organs including Gustation Olfaction Vision Sense of touch and Auditory Perception It elucidates the mechanisms behind sensory perception examines abnormalities and discusses factors influencing perception all crucial for training proficient sensory panelists The book also delves into advanced sensory evaluation techniques including their application in developing innovative food products addressing the need for up to date knowledge in the field
