Eco-Capitalism Robert Guttman, 2018-06-20 Our planet faces a systemic threat from climate change which the world community of nations is ill prepared to address and this book argues that a new form of ecologically conscious capitalism is needed in order to tackle this serious and rising threat While the Paris Climate Agreement of 2015 has finally implemented a global climate policy regime its modest means belie its ambitious goals Our institutional financial organizations are not equipped to deal with the problems that any credible commitment to a low carbon economy will have to confront We will have to go beyond cap and trade schemes and limited carbon taxes to cut greenhouse gas emissions substantially in due time This book offers a way forward toward that goal with a conceptual framework that brings environmental preservation back into our macro economic growth and forecasting models This framework obliges firms to consider other goals beyond shareholder value maximization outlining the principal tenets of a climate friendly finance and introducing a new type of money linked to climate mitigation and adaptation efforts

ensure the goals are achieved across all nations In a search of fresh approaches to the longstanding problems targeted by the Sustainable Development Goals the Japan International Cooperation Agency and the Global Economy and Development program at Brookings mounted a collaborative research effort to advance implementation of Agenda 2030 This edited volume is the product of that effort The book approaches the UN s goals through three broad lenses The first considers new approaches to capturing value Examples include Nigeria s first green bonds practical methods to expand women s economic opportunities benchmarking to reflect business contributions to achieving the goals new incentives for investment in infrastructure and educational systems that promote cross sector problem solving The second lens entails new approaches to targeting places including oceans rural areas fast growing developing cities and the interlocking challenge of data systems including geospatial information generated by satellites The third lens focuses on updating governance broadly defined Issues include how civil society can align with the SDG challenge how an advanced economy like Canada can approach the goals at home and abroad what needs to be done to foster new approaches for managing the global commons and how can multilateral institutions for health and development finance evolve *Global Financial Stability Report, October 2015* International Monetary Fund. Monetary and Capital Markets Department, 2015-10-07 The October 2015 Global Financial Stability Report finds that despite an improvement in financial stability in advanced economies risks continue to rotate toward emerging markets The global financial outlook is clouded by a triad of policy challenges emerging market vulnerabilities legacy issues from the crisis in advanced economies and weak systemic market liquidity With more vulnerable balance sheets in emerging market companies and banks firms in these countries are more susceptible to financial stress economic downturn and capital outflows Recent market developments such as slumping commodity prices China s bursting equity bubble and pressure on exchange rates underscore these challenges The prospect of the U S Federal Reserve gradually raising interest rates points to an unprecedented adjustment in the global financial system as financial conditions and risk premiums normalize from historically low levels alongside rising policy rates and a modest cyclical recovery The report also examines the factors that influence levels of liquidity in securities markets as well as the implications of low liquidity Currently market liquidity is being supported by benign cyclical conditions Although it is too early to assess the impact of recent regulatory changes on market liquidity changes in market structure such as larger holdings of corporate bonds by mutual funds appear to have increased the fragility of liquidity Finally the report studies the growing level of corporate debt in emerging markets which quadrupled between 2004 and 2014 The report finds that global drivers have played an increasing role in leverage growth issuance and spreads Moreover higher leverage has been associated with on average rising foreign currency exposures It also finds that despite weaker balance sheets firms have managed to issue bonds at better terms as a result of favorable financial conditions *The Once and Future Worker* Oren Cass, 2018-11-13 Cass s core principle a culture of respect for work of all kinds can help close the gap dividing the two Americas William A

Galston The Brookings Institution The American worker is in crisis Wages have stagnated for more than a generation Reliance on welfare programs has surged Life expectancy is falling as substance abuse and obesity rates climb These woes are not the inevitable result of irresistible global and technological forces They are the direct consequence of a decades long economic consensus that prioritized increasing consumption regardless of the costs to American workers their families and their communities Donald Trump's rise to the presidency focused attention on the depth of the nation's challenges yet while everyone agrees something must change the Left's insistence on still more government spending and the Right's faith in still more economic growth are recipes for repeating the mistakes of the past In this groundbreaking re evaluation of American society economics and public policy Oren Cass challenges our basic assumptions about what prosperity means and where it comes from to reveal how we lost our way The good news is that we can still turn things around if the nation's proverbial elites are willing to put the American worker's interests first Which is more important pristine air quality or well paying jobs that support families Unfettered access to the cheapest labor in the world or renewed investment in the employment of Americans Smoothing the path through college for the best students or ensuring that every student acquires the skills to succeed in the modern economy Cutting taxes expanding the safety net or adding money to low wage paychecks The renewal of work in America demands new answers to these questions If we reinforce their vital role workers supporting strong families and communities can provide the foundation for a thriving self sufficient society that offers opportunity to all

Capacity Mechanisms in the EU Energy Markets Leigh Hancher, Adrien de Hauteclocque, Kaisa Huhta, Malgorzata Sadowska, 2022-10-13 Capacity remuneration mechanisms or simply capacity mechanisms have become a fact of life in member states energy markets and are one of the hottest topics in the wider European regulatory debate Concerned about the security of electricity supply national governments are implementing subsidy schemes to encourage investment in conventional power generation capacity alongside already heavily subsidized renewable energy sources With the increasingly connected European electricity markets the introduction of a capacity mechanism in one country not only tends to distort its national market but may also have unforeseeable consequences for neighbouring electricity markets As these mechanisms are adopted by member states with limited supra national coordination as well as consideration for the cross border impact they tend to cause serious market distortions and put the future of the European internal electricity market at risk This second edition will take stock of how capacity mechanisms have actually worked so far and consider the consequences they have for the European internal electricity market It will include a detailed overview of national capacity mechanisms their implications for the EU internal market and will outline the nature of market failures which are likely to occur in the European electricity markets This edition is intended to serve as a point of reference for regulators and policy makers on how to design optimal capacity mechanisms in Europe It will be an invaluable resource for anyone interested in energy market design regulation and competition issues
