Network Design with Applications to Transportation and Logistics Teodor Gabriel Crainic, Michel Gendreau, Bernard Gendron, 2021-07-16 This book explores the methodological and application developments of network design in transportation and logistics It identifies trends challenges and research perspectives in network design for these areas Network design is a major class of problems in operations research where network flow combinatorial and mixed integer optimization meet The analysis and planning of transportation and logistics systems continues to be one of the most important application areas of operations research Networks provide the natural way of depicting such systems so the optimal design and operation of networks is the main methodological area of operations research that is used for the analysis and planning of these systems This book defines the current state of the art in the general area of network design and then turns to its applications to transportation and logistics New research challenges are addressed Network Design with Applications to Transportation and Logistics is divided into three parts Part I examines basic design problems including fixed cost network design and parallel algorithms After addressing the basics Part II focuses on more advanced models Chapters cover topics such as multi facility network design flow constrained network design and robust network design Finally Part III is dedicated entirely to the potential application areas for network design These areas range from rail networks to city logistics to energy transport All of the chapters are written by leading researchers in the field which should appeal to analysts and planners

Handbook of Corrosion Engineering Chandrabhan Verma, Jeenat Aslam, Ruby Aslam, Saman Zehra, Chaudhery Mustansar Hussain, 2023-08-14 Handbook of Corrosion Engineering Modern Theory Fundamentals and Practical Applications explores recent progress in metals corrosion and associated protection processes spanning all corrosion related characteristics utilized in natural and industrial environments including monitoring and testing The book combines the science and engineering of corrosion to assist readers in conducting exact corrosion evaluations in the design and plant management phases including optimal protection methods The book examines the basics of corrosion science including the electrochemical mechanism thermodynamic and kinetic aspects different corrosion forms such as uniform localized and stress corrosion phenomena and protection systems adopted to combat corrosion including inhibitors coatings and cathodic protection Focuses on industrial requirements including codes standards regulations and specifications Recommends materials for control and prevention of corrosion damage Offers industry tested best practices rationales and case studies Covers materials corrosion corrosion inhibition coating heat treatment test and inspection and mechanical design and integrity Includes websites of interest and information about latest research Comprises exercises and practical examples to understand predict estimate and mitigate corrosion problems Features numerous pictures figures graphs and schematic models to ensure a clear understanding of the science and engineering of corrosion

The Impact of Nanoparticles on Agriculture and Soil Nar Singh Chauhan, Sarvajeet Singh Gill, 2023-05-11 The Impact of Nanoparticles on

Agriculture and Soil part of the Nanomaterials Plant Interaction series contributes the most recent insights into understanding the cellular interactions of nanoparticles in an agricultural setting focusing on current applications and means of evaluating future prospects In order to ensure and improve the biosafety of nanoparticles it is a primary concern to understand cellular bioprocess like nanomaterial s cellular uptake and their influence on cellular structural functional and genetic components This book addresses these and other important aspects in detail along with showcasing their applications in the area of agriculture With an international team of authors and experienced editors this book will be valuable to those working to understand and advance nanoscience to benefit agricultural production and human and environmental welfare In depth knowledge of these bioprocess will enable researchers to engineer nanomaterials for enhanced biosafety Guides the assessment of nanomaterials impact on agricultural and soil cellular metabolism and physiological characteristics Provides in depth insights into potential risks and hazards of nanoparticles Builds a foundation for further research and development

Understanding the Role of Time-Dimension in the Brain Information Processing
 Daya Shankar Gupta,Hugo Merchant,2017-04-13 Optimized interaction of the brain with environment requires the four dimensional representation of space time in the neuronal circuits Information processing is an important part of this interaction which is critically dependent on time dimension Information processing has played an important role in the evolution of mammals and has reached a level of critical importance in the lives of primates particularly the humans The entanglement of time dimension with information processing in the brain is not clearly understood at present Time dimension in physical world the environment of an organism can be represented by the interval of a pendulum swing the cover page depicts temporal unit with the help of a swinging pendulum Temporal units in neural processes are represented by regular activities of pacemaker neurons tonic regular activities of proprioceptors and periodic fluctuations in the excitability of neurons underlying brain oscillations Moreover temporal units may be representationally associated with time bins containing bits of information see the Editorial which may be studied to understand the entanglement of time dimension with neural information processing The optimized interaction of the brain with environment requires the calibration of neural temporal units Neural temporal units are calibrated as a result of feedback processes occurring during the interaction of an organism with environment Understanding the role of time dimension in the brain information processing requires a multidisciplinary approach which would include psychophysics single cell studies and brain recordings Although this Special Issue has helped us move forward on some fronts including theoretical understanding of calibration of time information in neural circuits and the role of brain oscillations in timing functions and integration of asynchronous sensory information further advancements are needed by developing correct computational tools to resolve the relationship between dynamic hierarchical neural oscillatory structures that form during the brain s interaction with environment *High Value*

Fermentation Products, Volume 1 Saurabh Saran,Vikash Babu,Asha Chaubey,2019-04-09 Green technologies are no longer

the future of science but the present With more and more mature industries such as the process industries making large strides seemingly every single day and more consumers demanding products created from green technologies it is essential for any business in any industry to be familiar with the latest processes and technologies It is all part of a global effort to go greener and this is nowhere more apparent than in fermentation technology This book describes relevant aspects of industrial scale fermentation an expanding area of activity which already generates commercial values of over one third of a trillion US dollars annually and which will most likely radically change the way we produce chemicals in the long term future From biofuels and bulk amino acids to monoclonal antibodies and stem cells they all rely on mass suspension cultivation of cells in stirred bioreactors which is the most widely used and versatile way to produce Today a wide array of cells can be cultivated in this way and for most of them genetic engineering tools are also available Examples of products operating procedures engineering and design aspects economic drivers and cost and regulatory issues are addressed In addition there will be a discussion of how we got to where we are today and of the real world in industrial fermentation This chapter is exclusively dedicated to large scale production used in industrial settings

The Ecological Brain Luis H. Favela,2023-12-22 The Ecological Brain is the first book of its kind using complexity science to integrate the seemingly disparate fields of ecological psychology and neuroscience The book develops a unique framework for unifying investigations and explanations of mind that span brain body and environment the NeuroEcological Nexus Theory NExT Beginning with an introduction to the history of the fields the author provides an assessment of why ecological psychology and neuroscience are commonly viewed as irreconcilable methods for investigating and explaining cognition

intelligent behavior and the systems that realize them The book then progresses to its central aim presenting a unified investigative and explanatory framework offering concepts methods and theories applicable across neural and ecological scales of investigation By combining the core principles of ecological psychology neural population dynamics and synergetics under a unified complexity science approach NExT offers a compressive investigative framework to explain and understand neural bodily and environmental contributions to perception action and other forms of intelligent behavior and thought The book progresses the conversation around the role of brains in ecological psychology as well as bodies and environments in neuroscience It is essential reading for all students of ecological psychology perception cognitive sciences and neuroscience as well as anyone interested in the history and philosophy of the brain mind sciences and their state of the art methods and theories
