NAME : _____

The Power of Pushes and Pulls

Have you ever wondered why a soccer ball rolls when you kick it, or why a toy car stops when you let go? It's all about forces! A force is a push or a pull that can make an object move, stop, or change its direction. Forces are happening all around you, all the time!

When you kick a soccer ball, you are applying a push force. You are pushing the ball away from you, and that makes it move. When you pull open a door, you are applying a pull force. You are pulling the door towards you. Even when you are just sitting still, forces are at work! Forces can be big or small. A big force, like a strong kick, can make a ball move fast. A small force, like a gentle tap, might only make it wiggle a little. Without pushes and pulls, nothing would ever move!

1. What is a force, according to the passage?

2. Give one example of a "push" force from the passage.

3. Give one example of a "pull" force from the passage.
