Chapter 1 Planet Earth

- 1** The carbon cycle is part of the natural exchange and recycling of materials in the environment. It relies on energy to bring about the changes involved. In the case of the carbon cycle this energy comes from chemical changes one of which is photosynthesis – a photochemical reaction dependent on sunlight.

Discussion could include reference to the major sources of energy that maintain the temperature of the planet, i.e. energy from the Sun and from radioactive decay in the Earth.

- 2**
- a** use cobalt chloride paper – turns from blue to pink; or use anhydrous copper sulfate powder – turns from white to blue [2]
 - b** as a coolant, or any other correct industrial use [1]
 - c** a substance that dissolves another to form a solution [1]
 - d**
 - i** burning coal in power stations or other correct source [1]
 - ii** kills fish in lakes, erodes statues/buildings [2]
 - iii** 64 [1]
 - e**
 - 1: filtration to remove solid particles [2]
 - 2: chlorination to kill bacteria/germs [2]
 - f** 21% [1]

[Total = 13]

- 3**
- a**
 - i** decay of vegetation; digestive processes in animals such as cows [2]
 - ii** carbon dioxide and water [2]
 - b** respiration and combustion output carbon dioxide; photosynthesis consumes carbon dioxide; these processes balance each other [4]

[Total = 8]

- 4**
- a** by fractional distillation of liquid air [2]
 - b**
 - i** $\text{H}-\text{H} \rightarrow 2\text{H}$ [1]
 - ii** $\text{O} + \text{H} \rightarrow \text{O}-\text{H}$ [1]
 - iii** endothermic [1]
 - c**
 - i** can be produced from water; doesn't produce any pollutants when burnt [2]
 - ii** not easily/cheaply available [1]

[Total = 8]

- 5**
- a** methane [1]
 - b** Respiration is burning sugar in the cells of the body to produce energy;
sugar + oxygen $\rightarrow$ water + carbon dioxide [3]
 - c** The combustion produces carbon dioxide but, as crops re-grow, the carbon dioxide is used by photosynthesis. [2]
 - d** more burning of fuels producing carbon dioxide at a faster rate than plants can take it up [2]

[Total = 8]

Human Biology Chiras,2018-02-16 Dan Chiras once again offers a refreshing and student friendly introduction to the structure function health and homeostasis of the human body in a modernized ninth edition of Human Biology This acclaimed text explores life from a variety of levels and perspectives including cellular molecular by body system through disease and within the environment Star Ark Rachel Armstrong,2016-11-13 As space ventures have become more numerous leading scientists and theorists have offered ways of building a living habitat in a hostile environment taking an ecosystems view of space colonization The contributors to this volume take a radical multi disciplinary view of the challenge of human space colonization through the ongoing project Persephone This book fundamentally challenges prevalent ideas about sustainability and proposes a new approach to resource austerity and conservation and providing truly sustainable approaches that are life

promoting Readers will learn the details of the plans for Persephone a real project that is part of the company Icarus
Interstellar s plans for the design and engineering of a living interior on a worldship to be constructed in Earth s orbit within
100 years Although the timeframe itself is only an estimate since it is contingent on many significant developments including
funding and technological advances the industry consensus is that within 100 years we will see manned space exploration
beyond our solar system This notion is shared by organizations such as the Initiative for Interstellar Studies and the DARPA
funded 100 year starship project This book specifically develops the principles for the construction of a living habitat within a
worldship a multi generational starship that contains its own world that supports colonists as it travels across great distances
between stars at a speed much slower than light Far from being a sterile industrial setup such as the ISS or even being a
bucolic suburbia as proposed by Gerard O Neill in the 1970s this worldship will provide the pre conditions for sustaining life
beyond Earth s environment which may also lead to the evolution of non terrestrial ecologies Drawing on the principles of
ecopoiesis and insights offered by the Biosphere 2 experiment that demonstrated what we have to learn about ecosystem
construction this book proposes first designing the soils of such a space It should then be possible to set up the conditions
that a first generation of colonists may experience in leaving our solar system to find new worlds to settle perhaps in
spreading life throughout the universe Although the book takes a unique view of ecology and sustainability within the setting
of a traveling starship it is equally concerned with the human experience on artificial worlds Chapters come from a range of
multi disciplinary thinkers who shed light on the brave new future ahead from different angles

PROC FCMP User-Defined Functions
Troy Martin Hughes, 2024-04-01 Elevate your programming skills with PROC FCMP In PROC FCMP User Defined Functions
readers are introduced to the SAS Function Compiler which enables users to create user defined functions and subroutines
These modular callable software components complement the diverse array of SAS built in functions and extend the SAS
programming language creating more building blocks for constructing future software The book opens by introducing the
role of functions in software design and explaining how functions improve software quality characteristics It then moves on
to basic PROC FCMP syntax including how to define and call user defined functions Next readers learn about the SAS array
and hash object the primary data structures leveraged by PROC FCMP and how PROC FCMP can manipulate them behind
the scenes Finally the Python Component Object is introduced which facilitates the interoperability of SAS and Python PROC
FCMP runs Python functions natively inside a SAS wrapper which allows open source functions to be incorporated without
needing to be rewritten in SAS PROC FCMP is a game changer This book empowers readers to not only build better software
but also to embrace a more productive and efficient software development environment
