Yearbook of the Maimonides Centre for Advanced Studies. 2017 Bill Rebigier, 2017-10-23 The Yearbook of the Maimonides Centre for Advanced Studies mirrors the annual activities of staff and visiting fellows of the Centre as well as scholars of the Institute for Jewish Philosophy and Religion at the University of Hamburg and reports on symposia workshops and lectures Although aimed at a wider audience the yearbook also contains academic articles and book reviews on scepticism in Judaism and scepticism in general **Recent Advances in Flowering Time Control** Christian Jung, Klaus

Pillen,Dorothee Staiger,George Coupland,Maria von Korff,2017-03-10 The onset of flowering is an important step during the lifetime of a flowering plant During the past two decades there has been enormous progress in our understanding of how internal and external environmental cues control the transition to reproductive growth in plants Many flowering time regulators have been identified from the model plant *Arabidopsis thaliana* Most of them are assembled in regulatory pathways which converge to central integrators which trigger the transition of the vegetative into an inflorescence meristem For crop cultivation the time of flowering is of upmost importance because it determines yield Phenotypic variation for this trait is largely controlled by genes which were often modified during domestication or crop improvement Understanding the genetic basis of flowering time regulation offers new opportunities for selection in plant breeding and for genome editing and genetic modification of crop species

The Nature of Physical Computation Oron Shagrir,2022 Computing systems are ubiquitous in contemporary life Even the brain is thought to be a computing system of sorts But what does it mean to say that a given organ or system computes What is it about laptops smartphones and nervous systems that they are deemed to compute and why does it seldom occur to us to describe stomachs hurricanes rocks or chairs that way These questions are key to laying the conceptual foundations of computational sciences including computer science and engineering and the cognitive and neural sciences Oron Shagrir here provides an extended argument for the semantic view of computation which states that semantic properties are involved in the nature of computing systems The first part of the book provides general background Although different in scope these chapters have a common theme namely that the linkage between the mathematical theory of computability and the notion of physical computation is weak The second part of the book reviews existing non semantic accounts of physical computation Shagrir analyze three influential accounts in greater depth and argues that none of these accounts is satisfactory but each of them highlights certain key features of physical computation that he eventually adopts in his own semantic account of physical computation a view that rests on a phenomenon known as simultaneous implementation or indeterminacy of computation Shagrir completes the characterization of his account of computation and highlights the distinctive feature of computational explanations
