Among the topics covered in Volume 1 are inpatient coding guidelines coding conventions coding tables and a drug reference. However the heart of this manual is the body system analysis based on chapters 1-17 of the Tabular list in Volume I of the ICD-9 CM Official Coding Guidelines. The chapters are categorized by body system such as respiratory digestive et al. The chapters in this study guide follow the same sequence as the Official Coding Guidelines. All chapters in addition to highlighting basic coding guidelines contain situation based coding tips and coding examples. A quiz follows each chapter reinforcing concepts in a rigorous manner that applies directly to the professional coding environment. The book also contains a selective discussion of invasive procedures that the coder will most likely encounter on the job and on the exam. At the end of ICD-9 CM Inpatient Coding Reference and Study Guide are 15 case studies providing the reader with an opportunity to assess their ICD-9 CM coding skill set and speed at coding inpatient medical records. Each record contains a face sheet history physical progress notes and answer sheet. Some of the case studies contain ER reports consultations as well as operative and pathology reports. The answer key at the end of this study guide contains a rationale for all code assignments. 456 short answer questions 116 multiple choice questions 15 full medical record case studies. Each question is highly relevant and reflects a coding situation most hospital based inpatient coders will face. The text strives to ensure the reader understands every diagnosis and procedure discussed thorough discussion of symptoms standard treatment protocols and medications. Coding examples and quizzes help clarify the information presented. Linda Kobayashi BA RHIT CCS has been a coder and coding manager for almost 20 years. Since 1998 Ms Kobayashi has owned and operated Codebusters Inc a nationwide coding consulting company.
