Teacher Emotions Matter: Nature, Antecedents, and Effects Junjun Chen, Hongbiao Yin, Anne Christiane Frenzel, 2021-01-05

When Teaching Writing Gets Tough Annamary Consalvo, Ann D. David, 2024 Writing instruction is a particular challenge because there is no singular linear solution to teaching students to write well This book approaches writing as a wicked problem that takes place in complicated contexts Through both scholarly research and teacher reflection it examines ELA classrooms and the experiences of writing teachers to identify approaches that have proven effective with adolescents The book uses wickedness to frame the problems of teaching writing and offers context specific solutions enacted by teachers While it addresses the realities of standardized ways of teaching and assessing writing the book also highlights the deep professional knowledge and practical strategies teachers bring to writing instruction in middle and high school classrooms Chapters grapple with tensions between testing and authenticity assessing writing in nuanced ways and finding enjoyment in the work of teaching writing amid and alongside persistent complexities Specific topics include students writing process revision students as decision makers multimodal writing assessment and writer s notebooks data driven instruction the high school to college transition and teacher professional development Book Features Includes examples of how teachers approach specific challenges associated with teaching writing to adolescents analyzing how and why their solutions proved effective Focuses on students engaged in writing in classrooms teachers implementing writing strategies and professional learning Offers a range of relevant voices on the topic of writing instruction with authors that include classroom teachers and scholars

Achieving Equal Educational Opportunity for Students of Color Richard R. Valencia, Valencia presents the most comprehensive theory based analysis to date on how society and schools are structurally organized and maintained to impede the optimal academic achievement of low SES marginalized K 12 Black and Latino Latina students compared to their privileged White counterparts The book interrogates how society contributes to educational inequality as seen in racialized patterns in income wealth housing and health and how public schools create significant obstacles for students of color as observed in reduced access to opportunities e g little access to high status curricula knowledge Valencia offers suggestions for achieving equal education e g implementing fairness of school funding improving teacher quality and providing students of color access to multicultural education by disrupting structural racism

Considering the rapid aging of the White population and the sharp decline of White youth coupled with the explosive growth in people of color this book argues that the American Imperative must be to assiduously mount an effort to provide an excellent education for students of color who the nation will depend on for a sizable proportion of its work force Book Features Examines how society and schools are failing Black and Latino Latina students principally Mexican Americans who are by far the largest Latino Latina group Uses theoretical frameworks that draw from analysis of structural inequality critical race theory anti deficit thinking narratives class by race covariation and an asset based perspective of students of color Discusses the American Imperative and the personal and economic consequences of not investing in students of color

Abiotic Stress Signaling in Plants: Functional Genomic Intervention, Volume II Girdhar Kumar Pandey, Ashish Kumar Srivastava, Amita Pandey, Maik Böhmer, 2024-01-31 This Research Topic is part of the Abiotic Stress Signaling in Plants Functional Genomic Intervention series Abiotic Stress Signaling in Plants Functional Genomic Intervention Abiotic stresses such as high temperature low temperature drought and salinity limit crop productivity worldwide Understanding plant responses to these stresses is essential for rational engineering of crop plants In Arabidopsis the signal transduction pathways for abiotic stresses light several phytohormones and pathogenesis have been elucidated A significant portion of plant genomes most studies are Arabidopsis and rice genome encodes for proteins involved in signaling such as receptor sensors kinases phosphatases transcription factors and transporters channels Despite decades of physiological and molecular effort knowledge pertaining to how plants sense and transduce low and high temperature low water availability drought water submergence and salinity signals is still a major question before plant biologist One major constraint hampering our understanding of these signal transduction processes in plants has been the lack or slow pace of application of molecular genomic and genetics knowledge in the form of gene function
