Macroeconomics James D. Gwartney, David Macpherson, Russell S. Sobel, Richard L. Stroup, 2003 Authors James D. Gwartney, Richard L. Stroup, Russell S. Sobel, and David Macpherson believe that a course on principles of economics should focus on the power and relevance of the economic way of thinking. It is this belief and corresponding writing approach that has made *Macroeconomics: Private and Public Choice* one of South Western Thomson Learning's most solid and enduring texts. Throughout this text, the authors integrate applications and real world data in an effort to make the basic concepts of economics come alive for the reader. Price Theory And Applications (Tenth Edition) Steven E. Landsburg, 2024-03-22 *Price Theory and Applications* challenges students to master the economic way of understanding the world with equal emphasis on intuition and precise logic and special emphasis on the interplay between them. The writing is inviting, humorous, and sometimes folksy without sacrificing the insistence that arguments need to be airtight. Important concepts are introduced via entertaining examples and fleshed out with rigor. The learning experience is supported by a vast number of intriguing and entertaining exhibits, examples, numerical exercises, and problem sets, some integrated within the text and others included at the end of chapters. The problems vary widely in their demands on students; some are straightforward applications of the theory, while others require a great deal of creativity and a willingness to think considerably outside the box. Monetary and Financial Systems in Africa Aloysius Ajab Amin, Regina Nsang Tawah, Augustin Ntembe, 2022-05-26 This book provides an overview of the monetary and financial systems seen in Africa. The issues related to these systems are examined to help evaluate their effectiveness in fostering the development of African economies. Economic integration is extensively discussed to highlight variations between different parts of Africa and the specific challenges seen within certain regions. The impact of monetary unions, in particular the CFA franc zone, on economic activities is also explored. This book aims to outline how sustainable development can be achieved in Africa through well-developed financial and monetary institutions and policies. It will be relevant to students, academics, and policy makers interested in African and development economics.
