

Analog Communication Viva Questions :-

Analog Communication is a data transmitting technique in which information signal is transmitted in analog nature. This always utilizes continuous signals to transmit data which may obtained from audio, image, video etc. An Analog signal is a variable signal continuous in both time and amplitude. To produce modulated signal inside the transmitter in Analog Communication, analog signal modulates the high carrier frequency. Then this modulated signal is transmitted with the help of antenna. All AM, FM audio transmission and T.V. transmission are the most preferable examples of analog communication. Analog communication is very important topic for the students preparing for GATE Exam(Electronics) Following questions will help to learn the basics concepts of analog communication.

1. Define Pam And Write Down Its Drawbacks?

Pulse Amplitude Modulation is the process by which the amplitude of the regularly spaced pulses varies according to the the amplitude of the modulating signal.

The drawbacks are:

- Since the amplitude of the pulses varies therefore the peak power of the modulating s/g is much greater.
- The bandwidth required for transmitting is greater since the amplitude varies.

2. How Can Be Aliasing Be Avoided?

Aliasing can be avoided if:

1. Sampling frequency must be greater than the frequency of the modulating signal.
2. The frequency should be band limited to maximum frequency of the signal(fm) Htz.
3. If prealias filter is used.

Physics Practical for Engineers with Viva-Voce Chandra Mohan Singh Negi, 2018-06-30 This is one of enumerable self help or how to books with an emphasis on Engineering Physics Practical The basic premise of the book is that there are certain simple experiments involving no more than rudimentary Physics laws and the very basic laws of Engineering Physics for undergraduate college engineering students But these practical are often not done or taken lightly for several reasons First people don't realize how easy they are to do Second and more fundamental they are not done because it does not occur to people to do them Finally and tragically no one in their elementary middle or high school educational experience has stressed the importance of doing

them and of course neither did they teach to do them This book is to reveal to you what the experiments are make them readily understandable and by means of a very easy to use illustrations The main thing you should expect from this book is the theories and practical related small information more precisely about experiments You will get a rudimentary understanding of the basic concepts behind the Engineering Physics experiment that governs the fundamental daily life questions that challenge us in life The book is divided into seven major categories and Fifteen chapters In this book the students will find solutions to experimental obstacles normally faced by undergraduate college engineering students students In summary you don t need any special background or ability to profit from this book *National Educational Technology Standards for Teachers* International Society for Technology in Education,2002 Standards were developed to guide educational leaders in recognizing and addressing the essential conditions for effective use of technology to support P 12 education **Inspecting the Interview** Carsten Junker,2024-09-03 Interviews are omnipresent in scholarship and public discourses They play a crucial role in various spheres from collecting research data to providing persons in the public eye a platform in print and online media Interviews do not only capture a dialogue they provide a framework in which dialogue gets staged As such a framework the interview protocols experiential knowledge and personal experience in certain ways according interlocutors different degrees of authority to speak The volume contributes state of the art research on what conclusions can be drawn from these and further reflections for a general assessment of the interview as method and form it offers fundamental conceptualizations of the interview as a structured and mediated site of knowledge production Theoreticians and practitioners assembled here conceptualize the interview from perspectives in different fields of the humanities and social sciences such as linguistics literary and cultural studies musicology psychology and philosophy
