Patterns of Heredity and Human Genetics

Section 12.1 Mendelian Inheritance of Human Traits

In your notebook, read about mating a pedigree.

Examine the pedigree on the right. Then answer the following questions.

1. Is the trait being studied in the pedigree recessive or dominant? Show the proof here!

2. Are II-1 and II-2 carriers of the trait? Show the proof here!

3. What is the probability that II-1 and II-2 will produce an individual with the trait being studied? Show a Punnett square in your notebook.

4. What is the likely genotype of II-4 for the trait being studied in the pedigree?

In your notebook, read about simple recessive heredity and simple dominant heredity.

Put each item in Column A, under the form of the matching item from Column B.

Column A

- _____ 1. Excessive sweating that results from the presence of an autosomal recessive trait is called _____.
- _____ 2. Excess growth disorder caused by a dominant allele.
- _____ 3. Most common genetic disorder among white Americans.
- _____ 4. Excessive sweating that results from the presence of an autosomal dominant trait is called _____.
- _____ 5. Tongue-rolling and hitchhiking by _____.

Column B

- a. cystic fibrosis
- b. simple dominant trait
- c. Tay-Sachs disease
- d. Huntington's disease
- e. phenylketonuria

[The Science of Human Perfection](#) Nathaniel Comfort,2012-09-25 Almost daily we hear news stories advertisements and scientific reports that promise genetic medicine will make us live longer

enable doctors to identify and treat diseases before they start and individualize our medical care But surprisingly a century ago eugenicists were making the same promises The Science of Human Perfection traces the history of the promises of medical genetics and of the medical dimension of eugenics The book also considers social and ethical issues that cast troublesome shadows over these fields

divDIV DIVKeeping his focus on America science historian Nathaniel Comfort introduces the community of scientists physicians and public health workers who have contributed to the development of medical genetics from the nineteenth century to today He argues that medical genetics is closely related to eugenics and indeed the two cannot be fully understood separately He also carefully examines how the desire to relieve suffering and to improve ourselves genetically though noble may be subverted History makes clear that as patients and consumers we must take ownership of genetic medicine using it intelligently knowledgeably and skeptically lest pernicious interests trump our own

Genes, Brains, and Human Potential Ken Richardson,2017-03-21

For countless generations people have been told that their potential as humans is limited and fundamentally unequal The social order they have been assured is arranged by powers beyond their control More recently the appeal has been to biology specifically the genes brain sciences the concept of intelligence and powerful new technologies Reinforced through the authority of science and a growing belief in bio determinism the ordering of the many for the benefit of a few has become more entrenched Yet scientists are now waking up to the influence of ideology on research and its interpretation In *Genes Brains and Human Potential* Ken Richardson illustrates how the ideology of human intelligence has infiltrated genetics brain sciences and psychology flourishing in the vagueness of basic concepts a shallow nature versus nurture debate and the overhyped claims of reductionists He shows how ideology more than pure science has come to dominate our institutions especially education encouraging fatalism about the development of human intelligence among individuals and societies *Genes Brains and Human Potential* goes much further building on work being done in molecular biology epigenetics dynamical systems evolution theory and complexity theory it maps a fresh understanding of

intelligence and the development of human potential Concluding with an upbeat message for human possibilities this synthesis of diverse perspectives will engender new conversations among students researchers and other interested readers
