Industrially Important Fungi for Sustainable Development Ahmed M. Abdel-Azeem, Ajar Nath Yadav, Neelam Yadav, Zeba Usmani, 2021-06-18 Fungi are an understudied biotechnologically valuable group of organisms Due to their immense range of habitats and the consequent need to compete against a diverse array of other fungi bacteria and animals fungi have developed numerous survival mechanisms However besides their major basic positive role in the cycling of minerals organic matter and mobilizing insoluble nutrients fungi have other beneficial impacts they are considered good sources of food and active agents for a number of industrial processes involving fermentation mechanisms as in the bread wine and beer industry A number of fungi also produce biologically important metabolites such as enzymes vitamins antibiotics and several products of important pharmaceutical use still others are involved in the production of single cell proteins The economic value of these marked positive activities has been estimated as approximating to trillions of US dollars The unique attributes of fungi thus herald great promise for their application in biotechnology and industry Since ancient Egyptians mentioned in their medical prescriptions how they can use green molds in curing wounds as the obvious historical uses of penicillin fungi can be grown with relative ease making production at scale viable The search for fungal biodiversity and the construction of a living fungi collection both have incredible economic potential in locating organisms with novel industrial uses that will lead to novel products Fungi have provided the world with penicillin lovastatin and other globally significant medicines and they remain an untapped resource with enormous industrial potential Volume 1 of Industrially Important Fungi for Sustainable Development provides an overview to understanding fungal diversity from diverse habitats and their industrial application for future sustainability It encompasses current advanced knowledge of fungal communities and their potential biotechnological applications in industry and allied sectors The book will be useful to scientists researchers and students of microbiology biotechnology agriculture molecular biology and environmental biology

Agriculturally Important Fungi for Sustainable Agriculture Ajar Nath Yadav, Shashank Mishra, Divjot Kour, Neelam Yadav, Anil Kumar, 2020-06-25 Microbes are ubiquitous in nature Among microbes fungal communities play an important role in agriculture the environment and medicine Vast fungal diversity has been associated with plant systems namely epiphytic fungi endophytic fungi and

rhizospheric fungi These fungi associated with plant systems play an important role in plant growth crop yield and soil health Rhizospheric fungi present in rhizospheric zones get their nutrients from root exudates released by plant root systems which help with their growth development and microbe activity Endophytic fungi typically enter plant hosts through naturally occurring wounds that are the result of plant growth through root hairs or at epidermal junctions Phyllospheric fungi may survive or proliferate on leaves depending on material influences in leaf diffuseness or exudates The diverse nature of these fungal communities is a key component of soil plant systems where they are engaged in a network of interactions endophytically phyllospherically as well as in the rhizosphere and thus have emerged as a promising tool for sustainable agriculture These fungal communities promote plant growth directly and indirectly by using plant growth promoting PGP attributes These PGP fungi can be used as biofertilizers and biocontrol agents in place of chemical fertilizers and pesticides for a more eco friendly method of promoting sustainable agriculture and environments This first volume of a two volume set covers the biodiversity of plant associated fungal communities and their role in plant growth promotion the mitigation of abiotic stress and soil fertility for sustainable agriculture This book should be useful to those working in the biological sciences especially for microbiologists microbial biotechnologists biochemists and researchers and scientists of fungal biotechnology
