Semantic Knowledge and Semantic Representations Rosaleen A. McCarthy,1995 What is the basis of our ability to assign meanings to words or to objects Such questions have until recently been regarded as lying within the province of philosophy and linguistics rather than psychology However recent advances in psychology and neuropsychology have led to the development of a scientific approach to analysing the cognitive bases of semantic knowledge and semantic representations Indeed theory and data on the organisation and structure of semantic knowledge have now become central and hotly debated topics in contemporary psychology This special issue of Memory brings together a series of papers from established laboratories that are at the forefront of semantic memory research The collection includes papers presenting theoretical overviews of the field as well as papers containing new experimental findings A variety of approaches to the problems of analysing semantic knowledge and semantic representations are included in this volume For example experimental studies of normal subjects are included together with neuropsychological investigations of patients with impaired semantic memory and computational models of the representation of knowledge in normality and disease This collection will therefore be essential reading for researchers and others who are interested in memory function It will also be of interest to cognitive scientists linguists philosophers and others who have puzzled over the many complex and central questions that probe the roots of our ability to understand meaning **Technologies Shaping Instruction and Distance**

Education: New Studies and Utilizations Syed, Mahbubur Rahman,2009-12-31 This book covers the use of technology and the development of tools to support content exchange delivery collaboration and pedagogy used in distance education delivery Provided by publisher Cognitive Neuropsychological Approaches to Spoken Word Production Lyndsey Nickels,2002 The papers in this volume all examine the nature of spoken word production in aphasia and how this can inform current theories of language processing It comprises 7 papers by some of the foremost researchers in the field The first

paper in the volume is an introduction by the editor Dr Lyndsey Nickels which reviews the state of the art of the cognitive neuropsychology of spoken word production both in terms of theory and methodology The individual papers address a range of topical issues including the levels of processing in speech production Lambon Ralph Moriarty Sage et al Wilshire the nature of the interaction between levels of processing Goldrick and effects of different factors on naming word class and context Berndt Burton Haendiges phonemic and orthographic cues Best Herbert Hickin Osborne lexical stress Howard Smith Taken together this volume provides the reader with an insight into the cutting edge of research in spoken word production
