Historical Modules for the Teaching and Learning of Mathematics Victor J. Katz, Karen Dee Michalowiz, 2020-03-02 Contains 11 modules consist of a number of activities designed to demonstrate the use of the history of mathematics in the teaching of mathematics Objectives of the Modules To enable students to develop a much richer understanding of mathematics and its applications by viewing the same phenomena from multiple mathematical perspectives To enable students to understand the historical background and connections among historical ideas leading to the development of mathematics To enable students to see how mathematical concepts evolved over periods of time To provide students with opportunities to apply their knowledge of mathematics to various concrete situations and problems in a historical context To develop in students an appreciation of the history connected with the development of different mathematical concepts To enable students to recognize and use connections among mathematical ideas To enable students

to understand how mathematical ideas interconnect and build on one another to produce a coherent whole To lead students to recognize and apply mathematics in contexts outside of mathematics Publisher **College Geometry with GeoGebra** Barbara E. Reynolds, William E. Fenton, 2021-01-20 From two authors who embrace technology in the classroom and value the role of collaborative learning comes College Geometry Using GeoGebra a book that is ideal for geometry courses for both mathematics and math education majors The book's discovery based approach guides students to explore geometric worlds through computer based activities enabling students to make observations develop conjectures and write mathematical proofs This unique textbook helps students understand the underlying concepts of geometry while learning to use GeoGebra software constructing various geometric figures and investigating their properties relationships and interactions The text allows students to gradually build upon their knowledge as they move from fundamental concepts of circle and triangle geometry to more advanced topics such as isometries and matrices symmetry in the plane and hyperbolic and projective geometry Emphasizing active collaborative learning the text contains numerous fully integrated computer lab activities that visualize difficult geometric concepts and facilitate both small group and whole class discussions Each chapter begins with engaging activities that draw students into the subject matter followed by detailed discussions that solidify the student conjectures made in the activities and exercises that test comprehension of the material Written to support students and instructors in active learning classrooms that incorporate computer technology College Geometry with GeoGebra is an ideal resource for geometry courses for both mathematics and math education majors **Educational Research and Innovation Promoting Education Decision Makers' Use of Evidence in Flanders** Shewbridge Claire, Köster Florian, 2021-11-22 The introduction of standardised tests in Flemish schools aims to generate regular reliable data for educators and policy makers At an early stage of development this report uses a research based framework to engage stakeholders in thinking about the opportunities standardised tests could bring for their work Innovative Technology-based Solutions for Primary, Secondary and Tertiary STEM Education Cristina Hava Muntean, Diana Bogusevschi, Gabriel-Miro Muntean , 2019-09-23 This book presents innovative technology enhanced learning solutions for STEM education proposed by the EU Horizon 2020 funded NEWTON project by first highlighting the benefits and limitations of existing research work e learning systems and case studies that embedded technology in the teaching and learning process NEWTON's proposed innovative technologies and pedagogies include adaptive multimedia and multiple sensorial media virtual reality fabrication and virtual labs gamification personalisation game based learning and self directed learning pedagogies The main objectives are to encourage STEM education among younger generations and to attract students to STEM subjects making these subjects more appealing and interesting Real life deployment of NEWTON technologies and developed educational materials in over 20 European educational institutions at primary secondary and tertiary levels demonstrated statistical significant increases in terms of learner satisfaction learner motivation and knowledge acquisition

Primary Mathematics Penelope Baker, Rosemary Callingham, Tracey Muir, 2023-09-07 Primary Mathematics Integrating Theory with Practice is a comprehensive introduction to teaching mathematics in Australian primary schools. Closely aligned with the Australian Curriculum, it provides a thorough understanding of measurement, geometry, patterns and algebra, data and statistics, and chance and probability. The fourth edition provides support for educators in key aspects of teaching, planning, assessment, digital technologies, diversity in the classroom, and integrating mathematics content with other learning areas. It also features a new chapter on the role of education support in the mathematics classroom. Each chapter has been thoroughly revised and is complemented by classroom snapshots demonstrating practical application of theories, activities to further understanding, and reflection questions to guide learning. New in this edition are Concepts to Consider, which provide a guided explanation and further discussion of key concepts to support pre and in-service teachers' learning and teaching of the fundamentals of mathematics.

ICGG 2024 - Proceedings of the 21st International Conference on Geometry and Graphics Kazuki Takenouchi, 2024-09-26 This three-volume book gathers peer-reviewed papers presented at the 21st International Conference on Geometry and Graphics (ICGG 2024) held in Kitakyushu, Japan, on August 5-9, 2024. The conference started in 1978 and is promoted by the International Society for Geometry and Graphics, which aims to foster international collaboration and stimulate scientific research and teaching methodology in the fields of Geometry and Graphics. The ICGG 2024 covered the following five topics taken over from ICGG 2022: Theoretical Graphics and Geometry, Applied Geometry and Graphics, Engineering Computer Graphics, Graphics Education, and Geometry and Graphics in History, to which a Related Topic section was added in response to the growing body of research on Geometry and Graphics. Volume 1 collects papers on three of these topics: Theoretical Graphics and Geometry, Graphics Education, and Related Topics. Given its breadth of coverage, the book introduces engineers, architects, and designers interested in computer applications, graphics, and geometry to the latest advances in the field, with a particular focus on science, the arts, and mathematics education.

Teacher Learning of Ambitious and Equitable Mathematics Instruction Ilana Horn, Brette Garner, 2022-03-17 Drawing on sociocultural learning theory, this book offers a groundbreaking theory of secondary mathematics teacher learning in schools, focusing on the transformation of instruction as a conceptual change project to achieve ambitious and equitable mathematics teaching. Despite decades of research showing the importance of ambitious and equitable teaching, few inroads have been made in most U.S. classrooms, and teacher learning in general remains undertheorized in most educational research. Illustrating their theory through closely documented case studies of secondary mathematics teachers' learning and instructional practices, authors Horn and Garner explore the key conceptual issues teachers are required to work through in order to more fully realize ambitious and equitable teaching in their classrooms. By theorizing teacher learning from a sociocultural perspective and focusing on instructional practice, the authors make a unique contribution to the field of teacher learning. This book offers researchers, scholars, and teacher educators new theoretical and methodological tools for

the elusive phenomenon of teacher learning and provides instructional leaders and coaches with practical examples of how teachers shift their thinking and practice The Theory of Educational Technology Rupert Wegerif, Louis Major, 2023-12-22 Educational technology is controversial some see it as essential to providing free global learning others view it as a dangerous distraction that undermines good education In both instances most theories that have previously been applied to educational technology do not account for the distinctive nature and vast potential of technology This book addresses this issue exploring how education has been bound up with technology from the beginning and recognising that educational aims have already been shaped by technologies Offering a dialogic theory of educational technology Rupert Wegerif and Louis Major respond to contemporary challenges to education within this book including but not limited to climate change misinformation on the internet and the impact of Artificial Intelligence Chapters introduce discuss and contextualise key theories and illustrate through case studies their uses within a diverse range of educational contexts spanning from primary education to adult lifelong learning Each chapter also concludes with a short summary demonstrating how these theories translate to practical implications for design A fascinating response to current developments in educational technology this is a crucial read for all involved in creating researching or making decisions about the use of technologies within educational contexts
